Brief Introduction

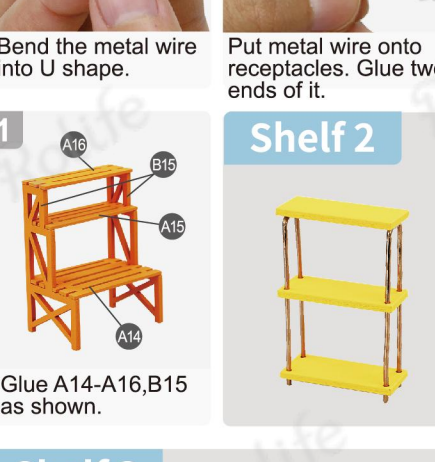

Tips of glue (The picture is only for reference.)

1. White latex is used for small wooden pieces. (It needs quite a long time to dry.)
2. Liquid glue is used for glue large wood parts and other materials.
3. Glue is a gift not for sale. If it becomes dry or expired due to time or environmental problems, you can use your own glue to assemble.

Liquid glue

Instructions of cutting

1. Cut the fabric according to the instruction.

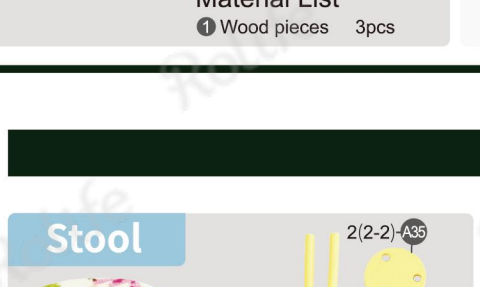

Tips of light bead

1. Refer to the right figure, and distinguish the electrodes. Connect the yellow wire with the positive electrode, the white wire with the negative electrode.
2. In the battery box, the red wire is positive; the black is negative.

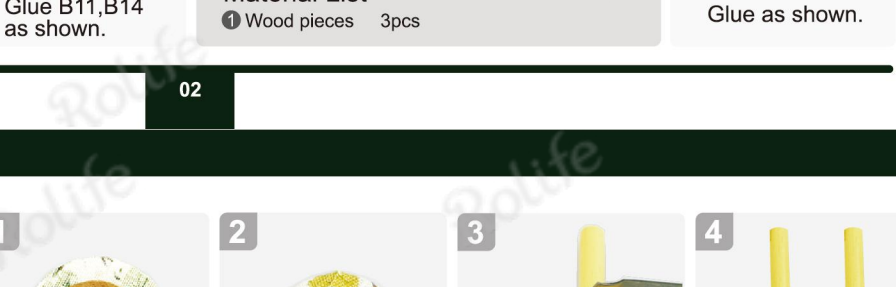

Tips of assembling

1. Small parts are included. Children must assemble under the guidance of adults in case of swallowing by mistake.
2. Put the remains back to original bags after taking enough dosage in each step till completed. (In case of missing materials)
3. All the dimension in the instruction is shown in millimeter (mm).
4. Find the part you need according to material list and the 1:1 part illustration paper (for wood parts). Check its number and size carefully before assembling.
5. When assembling, note the position of the parts shown in the material list, and take them out for use.
6. The product requires 2*AA/AA, R03/AAA 1.5V batteries. Batteries need to be provided by yourself.
7. Before loading or removing batteries, please loosen screws on the cover of the battery box with the screwdriver first.
