THE CRAFT OF VITICULTURE

Isabel Habets (Viticulturist) The grapes were sourced from trellised, dryland vineyards in the Devon Valley, Stellenbosch Kloof and Jonkershoek areas. Mostly south-west facing, they derive the maximum benefit from cooling maritime breezes that contribute to slow ripening of the grapes and concentrated fruit flavours.

THE CRAFT OF VINICULTURE

Bonny van Niekerk (Winemaker)

The grapes were harvested by hand in March at 24° to 26° Balling, when fruit and tannins were fully ripened but the berries and skins were still firm. The different vineyards blocks were separately vinified. Fermentation on the skins took place for 10 to 12 days at 27°C. The grapes were pressed at 5° Balling to ensure that no harsh or bitter tannins were extracted. After malolactic fermentation, the wine was matured in a combination of 300-litre oak barrels (80% French and 20% American oak), and stainless steel with staves (80% French and 20% American oak), for 12 months.
