

FOG PROOF HEATED Shower Mirror

**Shower Water Heats The Mirror...
Makes The Fog Disappear!**

Bead Flex Arm
The beads that create the arm are designed to snap apart rather than break if flexed too far. These instructions show how to successfully reassemble the beads should they become separated. See Troubleshooting section.

How The Fog Proof Works
Installed properly, a trickle of shower water will be diverted from the shower stream, sprayed on the back of the mirror and will then flow out of the bottom of the mirror to the shower floor. This trickle of diverted shower water will keep the mirror fog free no matter how hot you make your shower.

Mirror Flow Control Valve
Turns on and off the trickle of diverted shower water used by the mirror to stay fog free.

- ? **Normal or Low Home Water Pressure?**
Set valve to full open position (as shown).
- ? **High Home Water Pressure?**
Turn valve to reduce flow of water to the mirror.

Plumbing Tape
Plumbing tape is included for sealing the mirror to shower pipe plumbing connection.

Tip: Hardware and home center stores sell rolls of plumbing tape in high and low grades. High grade tape is easier to use and performs best.

Shower Flow Control Valve
Turn to reduce water flow through the showerhead. Useful for conserving water while shaving, removing make-up and soaping up.

Acrylic Safety Mirror
DO NOT use abrasive cleansers to clean the mirror. Clean only with non-abrasive cleaners and a soft cloth. Paper towels will scratch the mirror surface.

Keep water droplets from spotting the mirror surface by wiping the mirror dry with a bath towel after each use.

Razor Hanger
Razor hanger can be snapped into any of the four drainage holes in the back side of the mirror to obtain the most preferred razor hanging location.

Installation continued on reverse

INSTALLATION

Remove showerhead from shower pipe.
Pliers may be required to loosen showerhead.
If pliers are needed, place a soft cloth between the pliers and the showerhead plumbing connector to prevent marring the surface.

Seal threaded shower pipe connection.
Apply several turns of included plumbing tape to seal threads.
If any leaking occurs after installation, remove mirror and add more turns of plumbing tape. If you run out of tape for any reason, plumbing tape is readily available for purchase at any hardware or home center store.

INSTALLATION Con't

Screw mirror connector clockwise onto shower pipe.

If pliers are needed for installation, protect mirror connector finish with a soft cloth.

Screw showerhead clockwise onto threaded mirror connection.

Snap razor hanger into one of the four holes in the back side of the mirror.

TROUBLESHOOTING

If the flexible arm is over-flexed the beads may pop apart. It is possible to pop the beads back together.

Straighten out the flexible arm.

Beads should be aligned as straight as possible.

Grasp the mirror arm and the section to be popped back together.

Carefully keep the separated parts together and aligned with one hand.

Strike the aligned parts firmly against a hard surface.

The beads should pop back together. If they do not, strike the parts again using more force.

WARRANTY

What does my warranty cover?

Your warranty covers your product for the period of one year after purchase from any defects in your product created at the time it was manufactured. It does not protect your product from normal wear and tear created during normal use. It also does not protect your product from any damage caused by you or anyone else.

Limited 1 Year Warranty

Showertek® warrants that for the period of one year this product will be free from defects in material and workmanship. Showertek®, at its option, will repair or replace this product or any component of the product found to be defective during this warranty period. Replacement will be made with a new or remanufactured product or component. If the product is no longer available, replacement may be made with a similar product of equal or greater value. This is your exclusive warranty.

This warranty is valid for the original retail purchaser from the date of initial retail purchase and is not transferable. Keep the original sales receipt. Proof of purchase is required to obtain warranty service. Showertek® dealers, service centers, or retail stores selling Showertek® products do not have the right to alter, modify or any way change the terms and conditions of this warranty.

This warranty does not cover normal wear of parts or damage resulting from any of the following: negligent use or misuse of the product, use contrary to the operating instructions, disassembly, repair or alteration by anyone other than Showertek® or an authorized service center (this includes damage due to use of tools or harsh chemicals). Further, the warranty does not cover Acts of God, such as fire, flood, hurricanes or tornadoes.

Showertek® shall not be liable for any incidental or consequential damages caused by the breach of any express or implied warranty. Except to the extent prohibited by applicable law, any implied warranty or merchantability or fitness for a particular purpose is limited in duration to the duration of the above warranty. Some states, provinces or jurisdictions do not allow the exclusion or limitation of incidental or consequential damages or limitations on how long an implied warranty lasts, so the above limitations or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state or province to province.

HOW TO OBTAIN WARRANTY SERVICE

Attach a tag to the product that includes your name, address, daytime telephone number and description of the problem. Include a copy of the original sales receipt. Carefully package the product and send either by UPS or Parcel Post with shipping and insurance prepaid to:

Showertek, Inc.
2775 Napa Valley Corporate Dr.
Napa, CA 94558-6295
