

TO WHOM IT MAY CONCERN

CARRIAGE OF LIFEJACKETS ON AIRCRAFT

The Lifejacket CO2 Gas Cylinders carried here are guaranteed tested to the following Specifications:

1. Will not burst until a pressure greater than 540 Bar
2. Each cylinder is pressure tested to 250 Bar
3. Each cylinder is filled at a temperature of 30° centigrade to a pressure of 100Bar.

These items can be carried on aircraft, with the approval of the operator, under current IATA Dangerous Goods Regulations. A copy of the relevant page is attached.
