

## Product Highlights

The world's first true safety scraper. Designed with a spring-loaded mechanism, the blade within the SL100 sits safely within an ergonomic handle, after each cut. The mechanism has a patented design to prevent the push-back force from being transmitted through the scraper to the user's thumb.

With the SL100's spring-loaded safety technology, you will feel confident that you're protected from injury—and frustration.

## Features

- Spring loaded safety feature
- Easy tool-free blade change
- High visibility green
- Mozart blade made in Solingen, Germany

## The Ritekknife Way

Passionate about a safer workplace for all, Ritekknife develops innovative cutting tools that are designed and engineered for maximum safety, durability, and ease of use.

### Our Mission

Our mission is to revolutionize workplace safety by creating the most innovative safety products attached to every worker's hip around the world.

### Our Values

- Customer Obsession
- Innovation
- Accountability
- Authenticity
- Warrior Spirit

## Our Products are Different

We make safety managers look like heroes – helping them eliminate risk and reduce cost, while equipping their end-users with cutting tools they love.

1. We have included safety features that other knife manufactures have ignored.
2. Our knives reduce repetitive motion injuries because we have thought through the ergonomics of the handles, blade angle, specific grindings, blade thickness and overall dimensions to greatly reduce resistance while cutting.
3. Ritekknife specifically designed products to help eliminate product damage because we have worked to perfect blade depth to protect what's inside the packages you open.
4. Our knives are more durable. They are designed and tested to stand up to the rigors of the industrial workplace. Our goal is to make knives that last and not end up in landfills.
5. Once our customers receive Ritekknife products, we are not done. We facilitate change for your associates through our rigorous training approach and high-touch support. Our goal is to dramatically increase the acceptance rates while creating a safer workplace.
