3x (D)

4 POSSIBILITÉS DIFFÉRENTES

Nous recommandons deux personnes pour l'installation

Vous aurez besoin d'une perceuse à main pour les trous dans le mur

La mèche nécessaire est  $\varnothing$  6 mm ou 15/64"  
Profondeur du trou dans le mur: 50 mm / 1.96"

Pour que le trou soit exactement à la bonne profondeur, mesurez 50 mm / 1,97" sur la mèche et placez un ruban adhésif autour de cette mesure pour marquer le trou. Arrêtez de percer lorsque vous atteignez cette profondeur.

Insérer le petit morceau de bois

Tracez une ligne à l'intersection du petit morceau de bois sur la face arrière

Retirer le petit morceau de bois

Visser la plaque métallique en L en suivant la ligne marquée

Insérer le petit morceau de bois avec la pièce métallique à l'arrière.

Vissez-le à l'assemblage
