

# Cielo Shelf

## ASSEMBLY INSTRUCTIONS

Package contains

2x

The stability of the Cielo shelf depends highly on the wall composition. Some fragile walls may require reinforcement (not included).

We recommend two people for the installation

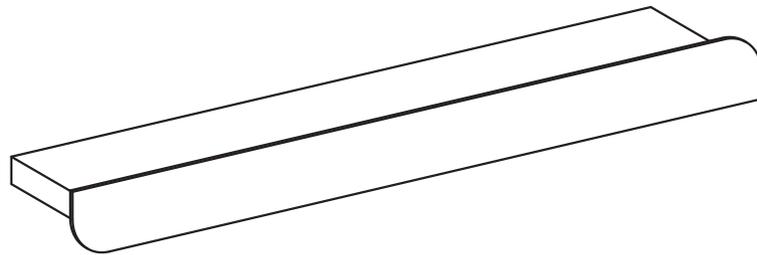

You will need a manual drill for the wall holes

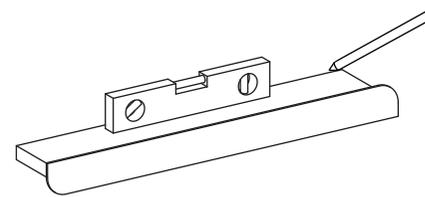

The drill bit required is  $\varnothing$  12 mm or 15/32"  
Depth of the hole in the wall: 50 mm / 1.97"

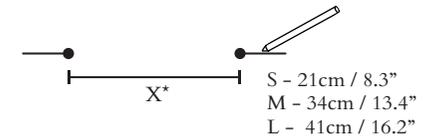

For the hole to be the exact depth, measure 50 mm / 1.97" on the drill bit and place tape around it to mark the distance. Stop drilling when it reaches that depth.

- 1° Hold the shelf to the wall and use the level tool to make sure it is horizontal. Draw two horizontal lines at the ends of the shelf to mark the angle. Put the shelf aside.

Measure the distance X\* depending on the size of your shelf to know where you'll drill the screw holes.

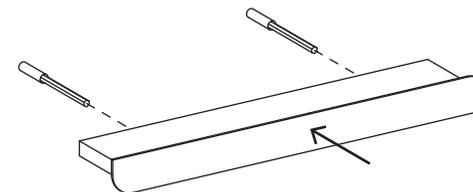

2°

Drill the holes in the wall and insert the shelf supports.

You may use the manual drill to tighten the shelf supports.

3°

Insert the shelf into the shelf supports that are now fixed to the wall. The shelf is held in place by pressure. If necessary, give small taps to secure its position.
