

COLLECTION

CLOE

Crafted from solid sustainable Oak wood, Cloe Modular Storage System design has eyelid-shaped corners that make a rounded profile and seamlessly meet its vertical legs, creating the illusion that the piece has just been carved out of a block of wood. Its minimalism is complemented by a meticulous design in which all hardware and joins are completely hidden throughout its structure. Integrating in this way different modules crafted in two sizes, a low module perfect for displaying items, and a higher one designed to add doors and conceal what the user needs.

Its design is completed with reversible doors either made out of wood with a vertical carving design on one side, and a smooth texture on the other, bringing two different styles for the piece and the possibility to completely conceal objects inside. Or a second option of metal doors with a cut-out design that can be overlapped to create different patterns, concealing objects in a delicate way with a bit of visibility from outside. All pieces are available in two color finishes, its materials include sustainable solid Oak wood.

Creado con madera maciza de roble sostenible, el diseño de el sistema modular de almacenamiento Cloe tiene esquinas en forma de párpado que forman un perfil redondeado y se unen a la perfección con sus patas verticales, creando la ilusión de que la pieza acaba de ser tallada en un bloque de madera. Su minimalismo se complementa con un meticuloso diseño en el que todos los herrajes y uniones quedan completamente ocultos en su estructura. Integrando así diferentes módulos elaborados en dos tamaños. uno bajo perfecto para exponer objetos, y otro más alto diseñado para añadir puertas y ocultar lo que el usuario necesite.

Por último, el diseño de Cloe se completa con puertas reversibles de madera, con un diseño tallado verticalmente en un lado y una textura lisa en el otro, o una segunda opción con puertas de metal con diseño esculpido que puede superponerse para crear diferentes diseños, ocultando objetos con un poco de visibilidad desde el exterior. Todas las piezas están disponibles en dos acabados de color, sus materiales incluyen madera maciza de roble sostenible.
