# Risco

Floating smartphone stand
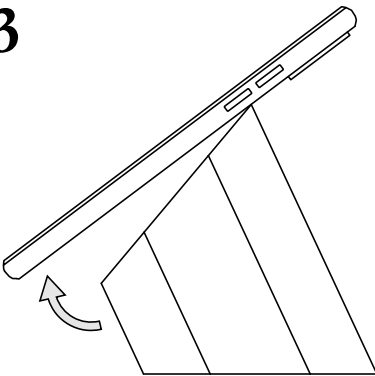

1

Remove the protective film

2

Now you can place your smartphone

(Depending on the texture of the smartphone and case, it will stick more or less, take your time to get used to the removable adhesive)
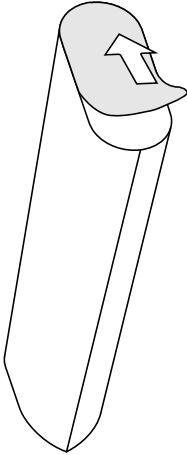

3

Release your phone with a lever motion

4

When the adhesive gets dirty, wash gently with your fingers, with water and without soap

Mallo

*Slim headphones stand*

1

Remove the protective film

2

Now you can place it in any surface

(Depending on the surface, it will stick more or less,take your time to get used to the removable adhesive)

**3**

Mallo will release easier if you tilt it to one side

4

When the adhesive gets dirty, wash gently with your fingers, with water and without soap.
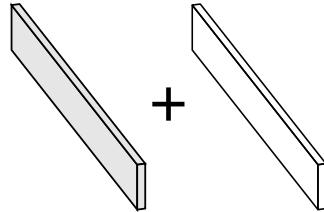

Loma

Vertical laptop stand

1 Try out the leather strip and supplement with your
computer before sticking it, to find the best fit.

**Option a**

Option b

+

Use only the vegan leather strip

Use the vegan leather strip with
the supplement

* For Apple products we recommend
the different options on the back

2 Remove the protective film/s and place it
