Mounting the CB Radio	8
Tuning the CB Antenna	9

Installation Overview

This guide will walk you through the steps of installing a CB radio system in a Dodge Ram truck. Below is a list of the CB products that will be used in this installation.

- Uniden 520 CB Radio (Follow same steps for Cobra 29 installation)
- Firestik FS CB Antenna
- Dodge Hood Mount
- Lug Antenna Stud
- FireRing Coax Cable with FME Connector
- SWR Meter & Jumper Cable

Recommended Tools

- Standard & Metric Wrench or Socket Set
- Flat Head Screwdriver
- Phillips Screwdriver
- "Grabber" Tool or Stiff Piece of Wire for Routing Coax Cable
- Electric Drill
- 3/8" and 5/16" drill bit
- Wire Taps & Disconnects for 14-16 Gauge Wire. Purchase at NAPA or Any Other Auto Part Store.

Installing the Antenna Mount & Antenna

Step 1: Open the hood of the Dodge Ram

Step 2: On the driver side of the vehicle, locate the bolt on the hood rail that is closest windshield.

Step 3: Using a 10 mm socket, remove the bolt and the washer below it. Removing the washer should reveal bare, non-painted metal.

Step 4: Attach the coax cable to the mount. To properly do this, you will need to remove the lower nylon washer from the antenna stud so the coax cable has metal-to-metal contact with the mount.

Step 5: Remove the lower isolation washer and then install the FireRing coax cable with the lip of the ring inside the hole of the mount.
