

Things To Know Before Using Your Bubble Blower

- 1. It takes approximately 20 seconds for the bubble solution to travel through the wand and produce bubbles. Just push the trigger once to turn the blower on.
- 2. Use a clean damp cloth to wipe the nozzle and avoid bubbles from drying up and blocking the nozzle of your Bubble Blower.
- 3. Replace batteries when the LED light starts to dim to enjoy your Bubble Blower at full capacity.
- 4. Bubble solution is non toxic. Do not throw away bubble solution bottles. Refill the original bottles.

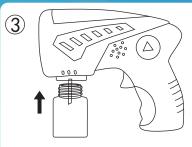

Getting Started

Insert 4 AA size batteries as shown above. (Batteries not included).

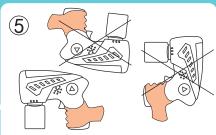

If your bubble solution is running low, fill the small bottle with more bubble solution from the larger bottle.

Attach the bubble bottle into the Bubble Blower, securing it tightly.

Turn the Bubble Blower on. It will take 20 seconds before bubbles start to come out.

Do not lay your Bubble Blower sideways or upside down. Make sure to always keep it upright.

CAUTION

- Do not drink the bubble solution.
- Do not touch your eyes after touching the bubble solution as it may cause discomfort.
- Recommended for outdoor use.
- Specifications, colors, and contents may vary from illustrations.
