

Backboard shall be 42" x 72" rectangular, injection molded, resin backboard with an overall thickness of 2". A total of approximately 100' of 3/16" thick molded ribs in the rear shall insure a rigid rebound surface. 7 ga. powder coated steel mounting plates shall be factory installed in each rear corner to provide durable mounting to any ceiling suspended or wall mounted structure with 62" wide x 35 1/2" high mounting pattern. A 7 ga. steel plate mounted to the rear of the backboard shall provide extra support at the rim mounting location. Backboard shall be molded white with official orange shooter square and border. Rear steel component shall be powder coated white. Compatible with rims with 5" wide x 4" tall mounting patterns. Total weight shall be approximately 130#.
