

System shall include two posts, net tensioning winch, competition net, side lacing ropes, center court hold down strap, and anchor. Posts shall be constructed of specially designed 3" diameter aluminum extrusion to maximize strength and eliminate rust. Posts shall also feature top cable pulleys, 1/2" diameter permanently fixed net side lacing bars, and a dark green powder coated finish. One pole shall include a brass internal top net cable tensioning device with removable handle. Posts shall be designed to install directly into concrete footing, but may be made removable with use of option PK23 or PK235 ground sockets. Net shall be official 21' 9" long x 36" high with 1 3/4" square black mesh, 4mm nylon coated stainless-steel top cable, and heavy white top tape. System shall meet all IFP and USAPA rules and specifications, and carry a two-year limited warranty (excluding net).
