

Posts shall be constructed of a special 3 1/2" OD 6063-T6 aluminum extrusion with a net adjusting track running the full length of the pole to facilitate infinite adjustment from tennis height (42") to men's competition volleyball (7' 11 5/8"). Height adjustment shall be accomplished by a single locking lever on each post and be clearly marked with height labels. Top net rope shall be tightened using a worm gear style winch with a 2" wide nylon strap. Bottom rope and net side tapes shall be tightened by means of ratcheting style tensioners. Aluminum pole shall have a powder coated finish. Top and bottom of pole shall be fitted with plastic floor protective inserts. Posts shall carry a 10-year limited warranty. Floor sockets (excluded in VB6050NS) shall consist of an aluminum socket assembly and an aluminum socket cap. The net shall be one meter high, be constructed of black polypropylene 3 1/2mm knotless woven webbing, have a Kevlar top rope and polypropylene bottom rope. Installation to be completed in accordance to manufacturer's instructions. Do not scale drawings. Entire system shall weigh 145#, (125# VB6050NS).
