Point of Entry (POE)

Point-of-entry or whole house systems treat all the water entering the home.

Counter Top (CT)

Counter top systems can either be placed on the kitchen counter or can be wall mounted (typically in Asia).

Under the Sink (UTS)

UTS systems are usually placed under the kitchen sink and do not clutter the kitchen counter.

Faucet mount (FM)

FM are small filters that go directly on the end of a faucet and are relatively easy to install. FM systems have low capacities and low flow rates as compared to pitchers and other types of water treatment systems.

Pitcher

These systems are also known as jug filters. Water is filtered by gravity through a filter cartridge, mostly made up of carbon. Pitchers and faucet mount systems are cheap residential water treatment systems available to consumers.

The study also covers replacement filters.

	<p>CT: Counter top</p> <p>POU: Point-of-use</p>		<p>RO: Reverse osmosis</p> <p>UV: Ultraviolet</p>	
<p>CAGR: Compound annual growth rate</p> <p>POE: Point-of-entry</p>		<p>FM: Faucet mount</p> <p>UTS: Under-the-sink</p>		<p>UF: Ultrafiltration</p> <p>NF: Nanofiltration</p>

About Verify Markets

Verify Markets is a Research Firm specializing in Industrial, Environmental, Energy, Consumer Products and Water markets. Our Research & Consulting practice provides global industry analysis, custom engagements, end-user analysis, strategy consulting, strategic market intelligence, and forecasts that are designed to facilitate strategic decision-making. Our team of consultants, industry experts and analysts continually monitor and evaluate information to create insights for your business needs. We are comprised of a group of analysts that have been tracking their respective markets for a number of years.

Our goal is to help you reach yours.

METHODOLOGY

The methodology when formulating market trend projection is outlined below. Historical trends were determined through secondary research and Verify Markets in-house database.

- Secondary research was conducted. A list of key industry participants was put together.
- Telephonic interviews were conducted. Most of the leading participants across China were contacted.
- Bottom up methodology was used to calculate the market size.
- Market drivers and restraints were built into the forecasting model to estimate the revenue growth and market size figures.

METHODOLOGY

Profiles of Interviewees: Vice President, Marketing Manager, Business Development Manager, Brand Manager, CEO (for smaller companies).

Most of the primary interview data was captured through telephonic interviews. Pictures, company contacts, preliminary data was captured through secondary research. Photos are derived from company websites and other web sources.

Despite Verify Markets' best efforts, certain challenges were encountered and certain assumptions had to be made. The extremely competitive nature of the Hong Kong Water Treatment Systems Market often results in an increased reluctance on the part of several competitors to discuss their market position, future plans, or market trends. Verify Markets used its skills and experience to extract the relevant data in order to complete the analysis.
