Definitions

Point of Entry (POE)

Point-of-entry or whole house systems treat all the water entering the home.

Counter Top (CT)

Counter top systems can either be placed on the kitchen counter or can be wall mounted (typically in Asia).

Under the Sink (UTS)

UTS systems are usually placed under the kitchen sink and do not clutter the kitchen counter.

Faucet mount (FM)

FM are small filters that go directly on the end of a faucet and are relatively easy to install. FM systems have low capacities and low flow rates as compared to pitchers and other types of water treatment systems.

Pitcher

These systems are also known as jug filters. Water is filtered by gravity through a filter cartridge, mostly made up of carbon. Pitchers and faucet mount systems are cheap residential water treatment systems available to consumers.

The study also covers replacement filters.

Disclaimer

Despite Verify Markets' best efforts, certain challenges were encountered, and certain assumptions had to be made. The extremely competitive nature of the Japan water treatment systems market often results in an increased reluctance on the part of several competitors to discuss their market position, future plans, or market trends. Verify Markets used its skills and experience to extract the relevant data in order to complete the analysis.
