Table of Contents

Asia Pacific Standalone Air Quality Monitor Market

I. Scope of Research	2
II. Executive Summary	6
a) Regional Trends	7
b) Market Changes Since 2015	8
c) Product Trends	9
d) Market Trends	11
e) Market Drivers	15
f) Market Restraints	16
g) Market Challenges	19
h) Revenue Forecasts Total Global Air Quality Monitor Market (2017-2024)	27
i) Market Share Information by Air Quality Monitor Sales Revenue.....	28
III. China	29
a) Revenue Forecasts Chinese Air Quality Monitor Market (2017-2024)	31
b) Unique Market Trends.....	32
IV. South Korea	34
a) Revenue Forecasts Chinese Air Quality Monitor Market (2017-2024)	36
b) Unique Market Trends.....	37

Table of Contents

Asia Pacific Standalone Air Quality Monitor Market

V. Japan	41
a) Revenue Forecasts Chinese Air Quality Monitor Market (2017-2024)	43
b) Unique Market Trends.....	44
VI. Taiwan	45
a) Revenue Forecasts Chinese Air Quality Monitor Market (2017-2024)	47
b) Unique Market Trends.....	48
VII. Sensor Technologies.....	50
VIII. Products.....	54
a) Global Products	55
b) Chinese Products	60
c) Korean Products	75
d) Japanese Products	80
e) Taiwanese Products	87
IX. About Verify Markets.....	98

Research Scope

Asia Pacific Standalone Air Quality Monitor Market

The following research report is focused on:

- APAC Product Trends and Profiles for China, Japan, Taiwan and South Korea
- Evolving Market Landscape – Did expectations from the previous 2015 study come to fruition? Why or why not?
- Market landscape details, trends, drivers, restraints and challenges.
- What is the current opportunity by country (China, South Korea, Japan & Taiwan)? How will it grow?
- What is the current product suite available for standalone air sensors? Who are the participants? What are their sales?
- What technologies and sensors are being utilized?
- What products are connected? How are they connected?
- What are they saying about the products and market?

The prices and products included in this study are current, as of July 20, 2018, and are subject to availability and fluctuation.

The methodology used for this research was combination of primary research and secondary research focused on air quality monitor manufacturers.
