Elegant and understated, this multi spout contemporary water feature would make a chic addition to any garden or urban space. The Veneto arrives in an already pre-weathered finish that will get slightly lighter over time. This water feature is completely self contained, so you will not require a water supply to the feature. The Veneto works by recycling water from the catch reservoir and pumping it into the back reservoir. The Veneto Fountain is now available in three sizes and includes a built in submersible pump.

- Veneto Low (Code: VEN120WF) // 117cm wide, 44cm deep and 65cm high // Weight 66kg.
