

Assembling the PapHat with a bow:

To avoid potential administrative issues at arrival in country of delivery, we prefer to pack your PapHat hatband flat and unassembled.

We recommend downloading the demonstration video for a visual guide on assembling the hatband.

Assembling the hatband is easy:

1. Lay the three fabric parts on a table.
2. Pinch the bow body.
3. Pinch the bow buckle to the bow body
4. Position the back of the bow on the ribbon with the right side facing up.
5. Wrap the free ends of the bow buckle around the ribbon.
6. Snap the button into place.
7. Adjust the bow as desired.

Attaching the Ribbon to the Hat

Two pins are included on the bristol card accompanying your PapHat. They can be used to attach the hatband to your hat if desired. The decision is yours. We prefer to keep the PapHat free unless the combination of the PapHat fabric and your hat makes it necessary. For optimal discretion, we recommend placing the pins behind the bow and/or near the adjustable buckle so that they are covered by the ribbon. Please refer to the pictures below for reference.

Care Instructions

Most of our PapHat have been treated with TexGuard for protection and sustainability. If necessary, dry cleaning is the recommended method for cleaning. We discourage hand washing.

Please follow these care instructions to ensure the longevity of your PapHat.
