ZEPHYR II BLUE 3D LASER SCANNER

Developed for the most challenging applications, Zephyr II Blue realises fast and accurate measurements. Its blue laser is particularly adapted for reflective surfaces and dark parts.

▶ PRODUCT ADVANTAGE

Reflective parts

The blue laser technology enables Zephyr II Blue to scan the reflective parts, as the lustrous metal or the black varnished with an excellent precision.

Zephyr II Blue can be integrated on any system: measuring arm, CMM or even robot.

Being connected to Ace 7-axis arm, Zephyr II Blue changes the colour and becomes red and black.
