

"I enjoy designing freely without limitations of manufacture in mind, to ensure that my vision is never compromised. The Tom Schneider brand offers unique style and my home theatre collection has been created to bring a contemporary, curved flair to the AV market"

ABOUT TOM SCHNEIDER

For over 20 years, Tom Schneider has been designing furniture and creating his own innovative production methods to bring his curvaceous designs to life. He is passionate about design and strives to create furniture with a strong sense of movement and individuality - following his mantra of 'Perfectly Curved Design' for every new piece.

The perfect balance between strong visual identity and effortless functionality is instantly recognisable

and defines the Home Theatre Collection. Iom's inspiration often comes from the beautiful forms in the natural world which spark his creativity. Sleek curves, rich sumptuous woods and meticulous craftsmanship are the hallmarks of his contemporary classic creations.

TOM SCHNEIDER

CRAFTSMANSHIP

At Tom Schneider, furniture is made with passion and produced to the highest quality. Individually handmade by a team of skilled artisans using innovative production techniques, each item of furniture is carefully crafted to achieve the perfect curved finish.

Unique in the furniture industry, we have created our own production methods to allow us to achieve the curved shapes that Tom's contemporary designs are renowned for. These techniques mean there is no large scale machinery used to produce our furniture. Expert hands form the shapes using jigs and formers, each expressly designed to create curves that are durable as well as beautiful.

Maintaining our reputation for excellence is a priority, so each item of furniture is meticulously inspected by a quality control technician before it leaves our factory ready to take pride of place in homes across the world.

TOM SCHNEIDER

HOME THEATRE COLLECTION

Welcome to the new Home Theatre collection. We have taken our unique signature style, our many years of experience in high-spec functional design and the in-depth knowledge of the audio visual industry to bring you an innovative collection of media cabinets for your home.

Blending unmistakable design and natural wood veneers with features like cable management, soundbar compatibility and flow through ventilation, the collection offers a wealth of possibilities, tailored to the most sophisticated media systems.

Find inspiration for your media room and create a perfect balance of aesthetics and function with a new collection that offers individual, contemporary style.

TOM SCHNEIDER

NATURAL WOOD

Natural wood is a wonderful material. The variation of grain patterns and hues between every tree creates a stunning visual; no two pieces are ever the same and this simply adds to the uniqueness of your furniture. We choose the finest veneers obtained from trees that are clearest of branches to avoid large knots and blemishes on your furniture.

All our designs are available in a choice of Natural Oak or Walnut.

We're committed to sourcing woods with due consideration for environmental issues, using veneers from countries where we can be sure there is no illegal logging. Using veneer is more ethical than solid wood, as only a fraction of wood is required to craft each piece of furniture. Veneers can be laid next to each other seamlessly to create a beautiful flowing finish that can't be achieved with solid wood.

OAK

Oak has a wonderfully strong grain pattern, with distinctive flecks and the tone can vary from light to mid brown.

WALNUT

Walnut has a beautiful grain character that has more figure variation than most other woods. Its colour can vary from a light to mid chocolate brown which lightens over time.

TAPER

The Taper Media Unit's modern, sleek design is both stylish and practical. Standing poised on tapered legs, this compact media unit uses clever design to allow for ventilation. Handmade with natural wood veneer, it has ample space for a soundbar, media boxes and players

ELLIPTIC

The Elliptic Deluxe Media Unit is a simple and elegant design. The open, curvaceous elliptical shape of the Elliptic Deluxe unit has an organic quality that will contrast beautifully with the straight lines of your TV. The stylish design is complemented by a toughened glass top and doesn't compromise practicality; it has full cable management and built in ventilation while providing space for a sound bar. It can also be positioned in corners to be compatible for a variety of living spaces.
