IMPORTANT SAFETY INSTRUCTIONS

Here are some basic guidelines for working with electricity.

- Before working on a circuit, go to the main service panel and remove the fuse or trip the breaker that controls that circuit.
- Tape a sign to the panel warning others to leave the circuit alone while you work.
- Before touching any wires, use a voltage tester to make sure they are not live.
- Whenever you check for voltage in a receptacle, check both outlets - each may be controlled by a separate wiring circuit.
- When replacing fuses, turn off the main power first. Make sure your hands and feet are dry and place one hand behind your back to prevent electricity from making a complete circuit through your chest. Touch a plug fuse only by its insulated rim. Remove cartridge fuses with a fuse puller.
- Use tools with insulated handles and ladders made of wood or fiberglass.
- To protect children, place safety cover over any unused outlets.
- This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operation of the product and the hazards involved.

CAUTION: Before installation, refer to electrical connections. If you do not have electrical wiring experience, refer to a do-it-yourself wiring handbook or have your light installed by a qualified licensed electrician.

INSTALLATION

A. J-BOX MOUNTING

- a1 Turn off the main power switch before installation.

- a2 Secure the mounting plate to the electrical junction box. Keep it up-right and level.

B. WALL MOUNTING

- b1 Attach the mounting plate to the wall. Use the drill bit to drill 4 holes then insert the wall anchors.

- b2 Secure the mounting plate to the wall with screws. Keep it up-right and level.

- 3 Connect wires with wire nuts.

- 4 Attach the light to the mounting plate, then secure it with included screws.

- 5 Flip the switch to bring your light back to life. Keep an eye out - when it starts blinking, you'll know that it's ready for a connection with your smartphone. If not, cycle the power OFF-ON five times and watch as everything resets itself into pairing mode.
