

EclipseUS™ Complete DRA

Use Rates:

0.625% v/v (2.5 quarts)
per 100 gallons of spray
solution with dicamba-
based tank mixes

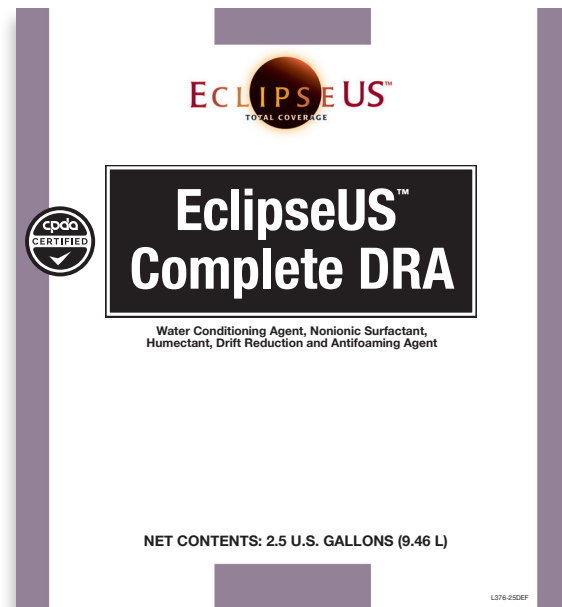

0.5-0.75% v/v (2-3
quarts) per 100 gallons
of spray solution with all
other tank mixes

Packaging:

2 x 2.5 gallons per case
250 gallon mini-bulk

Use With:

Dicamba, glyphosate, or
anytime drift reduction
is desired

EclipseUS™ Complete DRA is a combination of drift reduction technology and water conditioning agents. It minimizes drift risk and protects glyphosate and dicamba-based tank mixes from antagonistic metal ions found in hard water. **EclipseUS Complete DRA** is recognized as an approved DRA for dicamba.*

Why EclipseUS Complete DRA works better:

- Blocks hard water ions from reducing herbicide performance
- Enhances drift control, spray droplet retention and coverage
- Compatible with dicamba-based herbicides when used with specified nozzles
- Does not increase dicamba volatility

*Check manufacturer labels and websites for confirmation.
