

EclipseUS™ SDC

Use Rates:

4-6 fluid oz per acre in
5-20 GPA applications

6-8 fluid oz per acre in
20-40 GPA applications

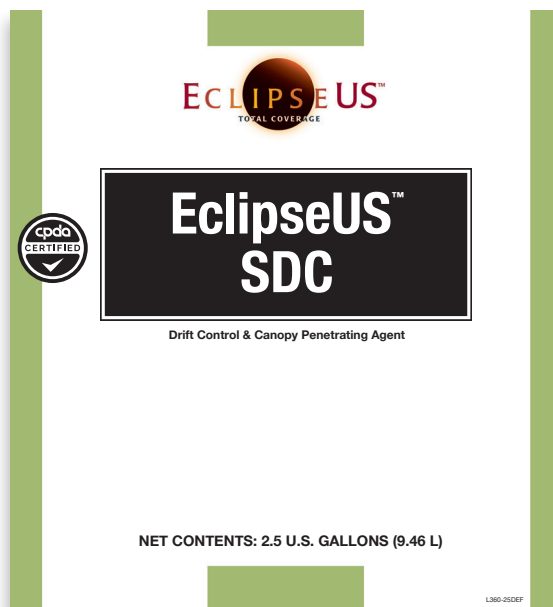

8-10 fluid oz per acre in
>40 GPA applications

Packaging:

2 x 2.5 gallons per case
250 gallon mini-bulk

Use With:

Liberty®, Interline™,
Cheetah® or other
glufosinate brands. Can
be used with liquid or
dry AMS at burndown
or in-crop application on
crops that contain the
LibertyLink® trait

EclipseUS™ SDC is formulated to enhance pesticide performance by reducing driftable fines while also improving canopy penetration, spray solution deposition and spray solution coverage. **EclipseUS SDC** is a great fit for Liberty® applications.

Why EclipseUS SDC works better:

- Reduces fine particles and spray drift to maintain the integrity of spray patterns
- Enhances nozzle performance, complementing air induction and flat fan nozzles
- Keeps spray droplets at the most effective sizes
- Convenient, low use-rates
- Can be mixed through inductors or over the top and with minimal agitation
