# TESTIMONIALS

## 1. What our customers say about us...

“The Kit storage building we use on our construction site has proven to be very valuable for our temporary need of extra storage.”

*T. Stensletten, J.U.org*

“We are very impressed with the professionalism, service and quality product and would have no hesitation in using Kit again for similar projects in future.”

*J. Flanagan, Stage One (UK)*

“From start to finish Kit Buildings have been extraordinary in their flexibility in producing our custom design through to quick and easy install. We feel our building has provided exceptional value for money and we will certainly be using yourselves again.”

*J. Howells, Social Espresso*

“We ordered 3 units for the purposes of environmental storage & recycling & are very happy with the results. Should we have any other requirements in future we would look forward to dealing with you again.”

*R. Kirk, Recycle Force*

“Thank you for your excellent service. I would like to praise your staff for a quick turnaround and a very cost effective solution.”

*W. Davies, AAA Transport*

our buildings

## **12. Why Choose KBS**

From design through to completion – kit does it all

## AREAS OF EXPERTISE

### Design & Consultancy

Using a range of highly sophisticated computer aided design facilities Kit Building Systems can design solutions to meet most requirements, large or small as well as price and delivery time frames that would amaze you!

Our investment in advanced technologies and personnel has set kit well ahead in the commercial building sector both in the design and the manufacturing techniques employed. Thereby allowing our staff to design, cost and provide quotations and drawings to your precise requirements quickly and accurately incorporating many options and features such as windows, doors etc and still remain within great value for money. We transmit your finalized design electronically to the manufacturing plant thereby reducing chances of human error, removing cost and minimising delivery lead times.

### Demolition, Groundworks, Construction & Installation

Kit offers comprehensive solutions to any installation related hurdles that may need to be overcome before an install can take place. These range from demolition to groundworks as well as electrical, machinery and racking fit outs.

### Self Build

For those individuals or companies that possess the practical capabilities to undertake construction themselves we supply our bespoke designed buildings as a complete 'kit' solution (encompassing everything necessary in terms of parts to complete the work) together with drawings and custom installation instructions. We also offer specialist advice – just talk to our sales staff for guidance and advice.
