- Pest Control Operators • Landscapers • Grounds & Greenskeepers

# GRANULAR VOLE REPELLENT

Vole Scram Professional is a granular repellent used to reduce and eliminate Voles from your lawn. Vole Scram Pro will safely and naturally stop vole infestation when used as directed. Apply Vole Scram with a broadcast spreader using the settings below or apply by hand with scoop in beds, mulch or rough grass. Early Sept, Early Oct. apply a 20 foot band to the perimeter of the property where voles are nesting during the summer months. This will help reduce voles from entering the property. **DIRECTIONS FOR NORTHERN SNOWFALL REGIONS:** 1<sup>st</sup> Application (Late October After Irrigation Is Off) Apply to areas that have repeated winter vole infestation each year. 2<sup>nd</sup> Application (November - 14 Days After 1<sup>st</sup> Application ) Re-apply to the same areas prior to snowfall (Voles problems seem to be heaviest in areas where snow drifting occurs) 3<sup>rd</sup> Application (Early Spring/Late Winter) Apply immediately after snow melt. **DIRECTIONS FOR MIDWEST & SOUTHERN REGIONS:** Apply 2 applications, 2 weeks apart, to areas that are showing vole damage. Repeat again 30 days after 2<sup>nd</sup> application.

**PRECAUTIONARY STATEMENTS** Wash skin after use. Avoid contact with eyes or cuts. If in eyes, flush with water 15-20 minutes. Call Poison Center or doctor for treatment. **Storage:** Store in original sealed container. Do not contaminate water, food or feed by storage or disposal. Do not apply directly to water. **Disposal:** Do not reuse empty container. Dispose of properly. Buyer assumes all responsibility for safety and use not in accordance with directions. Not for use on food or feed commodities.

SPREADER SETTINGS:		
	Lesco	22
