Decorative laminates were introduced in the industry to mimic natural materials existing in the environment.

The concept has natured over the years and has become one of the most preferred choice of decorative for the influencers of the industry. It is the ideal choice for surfaces like living room cabinets, kitchen cabinets, bedroom floors, tabletops, etc. They help to add personality and colour to your interiors.

ABOUT US

Amulya Mica Group started two decades back in 1998 and has become a preferred brand of choice for interior products.

The company has grown from strength to strength and having begun its operations from one product today has evolved into multi product company offering High Pressure Decorative Laminates, Plywood, PVC & WPC Panels & Doors, PVC Laminates, Blockboards, Flush doors, PVC Door Frame, Cladding for external laminates, etc. Organization is headquartered in the industrial progressive state of Gujarat at Gandhidham, a port town. Company's manufacturing operations have state of the art manufacturing set-up spread over 1.5 million square feet area which is also supported with warehouses in different zones of the country.

Amulya Mica Group is known for its innovation and wide range of products because the organization keeps in sync with international trend through a team of professional Architect, Interior Designer and Product development and hence offers its customers the latest trend. From raw material to finished product, the product passes through stringent quality checks at every stage thus ensuring its customers the best product.

AREA OF APPLICATION

Amulya MICA brings innovation to the table yet again by incorporating 360° view feature in every catalog to deliver a real-time immersive design experience for its consumers!

Living Room

Adorn the place where your family shares moments of zeal and warmth, with tranquility!

Bedroom

A sumptuous series that infuses a soothing vibe to your favorite space!

Kitchen & Dining

Bask your kitchen in the dexterity of natural accents & make it look ravishing as ever!

Premium Projects

Catering to your lavish lifestyle; we offer surface solutions that elevate your dwelling!

Commercial

Impart an earthly essence to magnify the tiny details of commercial places!

Imbibing nature's personal touch to your spaces with a plethora of textures and notes!

SAVE THE LIFE

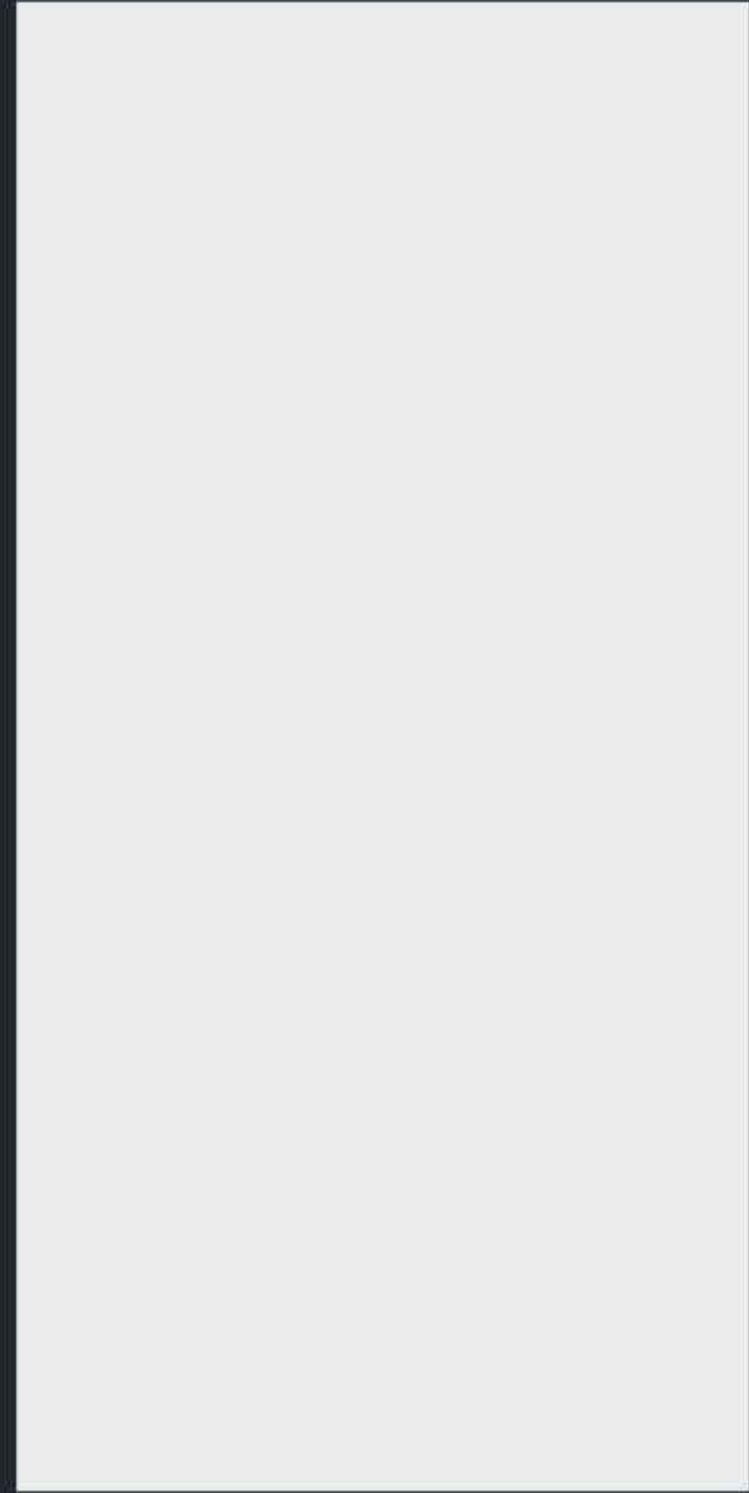

Infusing a tranquil refinement in your breathtaking surroundings; we deliver to you surfaces that are as ethereal as they are beautiful. Nature is an invigorating element that breathes life into every grain of our existence. Our collection is a suitable replacement for nature and is inspired by the patterns seen in real wood, which combine to create grandeur in your homes.

At Amulya MICA, we value ecological balance to prevent our mother earth from suffering harmful effects, hence we have planted more than one lakh trees till date, and have further adopted plantation projects in the village of Basti in Rajasthan and Kheda in Gujarat..

OTHER PRODUCTS BY AMULYA MICA

Amulya Mica Exterior Grade Laminates

Amulya Mica exterior grade laminates are manufactured using specialized chemicals and surface protection technology (SPT) which makes them suitable for exposure to harsh sun, rain, snow, and dust. The SPT technology prevents growth of microbes and algae which is a prime reason for external material on the buildings to get dark spots. Amulya Mica exterior grade laminates are recommended for bungalows, residential and commercial buildings which helps in saving air conditioning cost and retains the exterior facades, making them look always new.

Meets the requirements of EPH for colour fastness and Thomas bell wright for reaction to fire test.

Amulya Mica Compact Grade Laminates

Amulya Mica compact grade laminates are manufactured considering the applications which requires high wear and tear. These laminates are recommended for the tough environment of restroom partitions, lockers in schools or laboratory furniture, wall linings and even flat surface of table tops in restaurants, bars and mess.

Meets the requirements of EN 438 which comes in standard grade.

PVC Laminates

Dark, unfinished edges of tiles is a big challenge for applicators and to cover it, additional materials and specialized construction process is required which increases the cost. Amulya Mica tiles are the only solution which is cost effective and easy in application. Amulya Mica tiles are 90 degree bendable specially manufactured PVC laminate which seamlessly covers the edges of tabletops, walls, partitions, etc. or any other space that is exposed. Amulya Mica tiles are designed for applications in wet areas like kitchens and rest rooms hence have moisture resistant properties.

The material comes in a thickness availability up to 4 mm and can have colour core properties with no constraint in the length of the sheet with a maximum width of 4 feet.

PVC / WPC Door Frames

The rich ebony coloured door frame is anti-bacterial, warp resistant, termite, water & borer resistant. These profiles are ideal for both indoor and outdoor with high screw holding capacity and is ready to use and easy to paint.

The 100% solid composition product comes in numerous sizes and lengths and offers fittings for both single and double doors.

PVC / WPC Boards

The water, termite, flame and moisture resistant panels are maintenance-free and come in customized colours, thickness, density and size.

The product can have numerous decorative surfaces on its top surface such as paint, high pressure laminates, veneer, printing, paper/film lamination, CNC cutting etc. Furniture, doors, cabinets, restroom cubicles, lockers, laboratory and shutters are few of the applications where it is extensively used. However the superior properties of recyclability, corrosion resistant and up to 90-degree bendability property further taps the potential of the product in numerous avenues like making troughs in tea factory.

The material is ROHS complaint & SGS certified.

Plywood / Block Boards / Flush Doors

Amulya Mica Plywood has the capability to fulfill different requirements of the market. The infrastructure is designed to manufacture highest quality of block boards, flush door and plywoods.

Some of our futuristic products includes Zero emission, fire retardant and anti-virus properties.
