

Moregola Fine Jewelry - Ring Size Guide

How to measure your ring size:

Option 1: Measure your finger

1. Grab a tape measure, length of string or strip of paper.
2. Wrap it around the finger you'll wear your ring on - if you're creating a ring stack, consider where on your finger the ring will sit - and mark the place where it joins.
3. Lay your string or paper strip on a flat surface and use a ruler to measure the length up to the mark. Use the **circumference** in the chart below to match the measurement to the closest ring size.

Option 2: Measure existing ring

1. Choose a ring that already fits your finger well.
2. Measure the interior diameter of the ring in millimeters (mm).
3. Use the **diameter** in the measurement chart below to match the size of your ring to the closest size in mm.

Alternatively you can simply print this page in A4 format (page scale must be set to "none" in the print settings) and place your ring on the circles below. To check that the Size Chart has been printed properly, take a ruler and measure the line below. It should measure exactly 2 cm.
