

# SMART CONTROL SYSTEM

**GENIO ProRoast**  
PERFECT CONSISTENCY

Achieving consistency and full control is just some of the benefits of using this initiative control system.

The control system consists of the latest Samsung Galaxy Tablet, a control panel with turning dials and ProRoast Android App that are already included in the purchasing price of your roaster. That's right, no additional cost, subscriptions of paid features.

The Genio Smart Control System has 5 different roasting modes, depending on your preference and requirements. Switching between the different modes is achieved by the quick turn of a dial on the control panel. The different modes is:

- Standby Mode
- Prime Mode
- Roast Mode
- Profile Mode
- Auto Mode

**GAME-CHANGER FOR YOUR COFFEE ROASTERY BUSINESS**

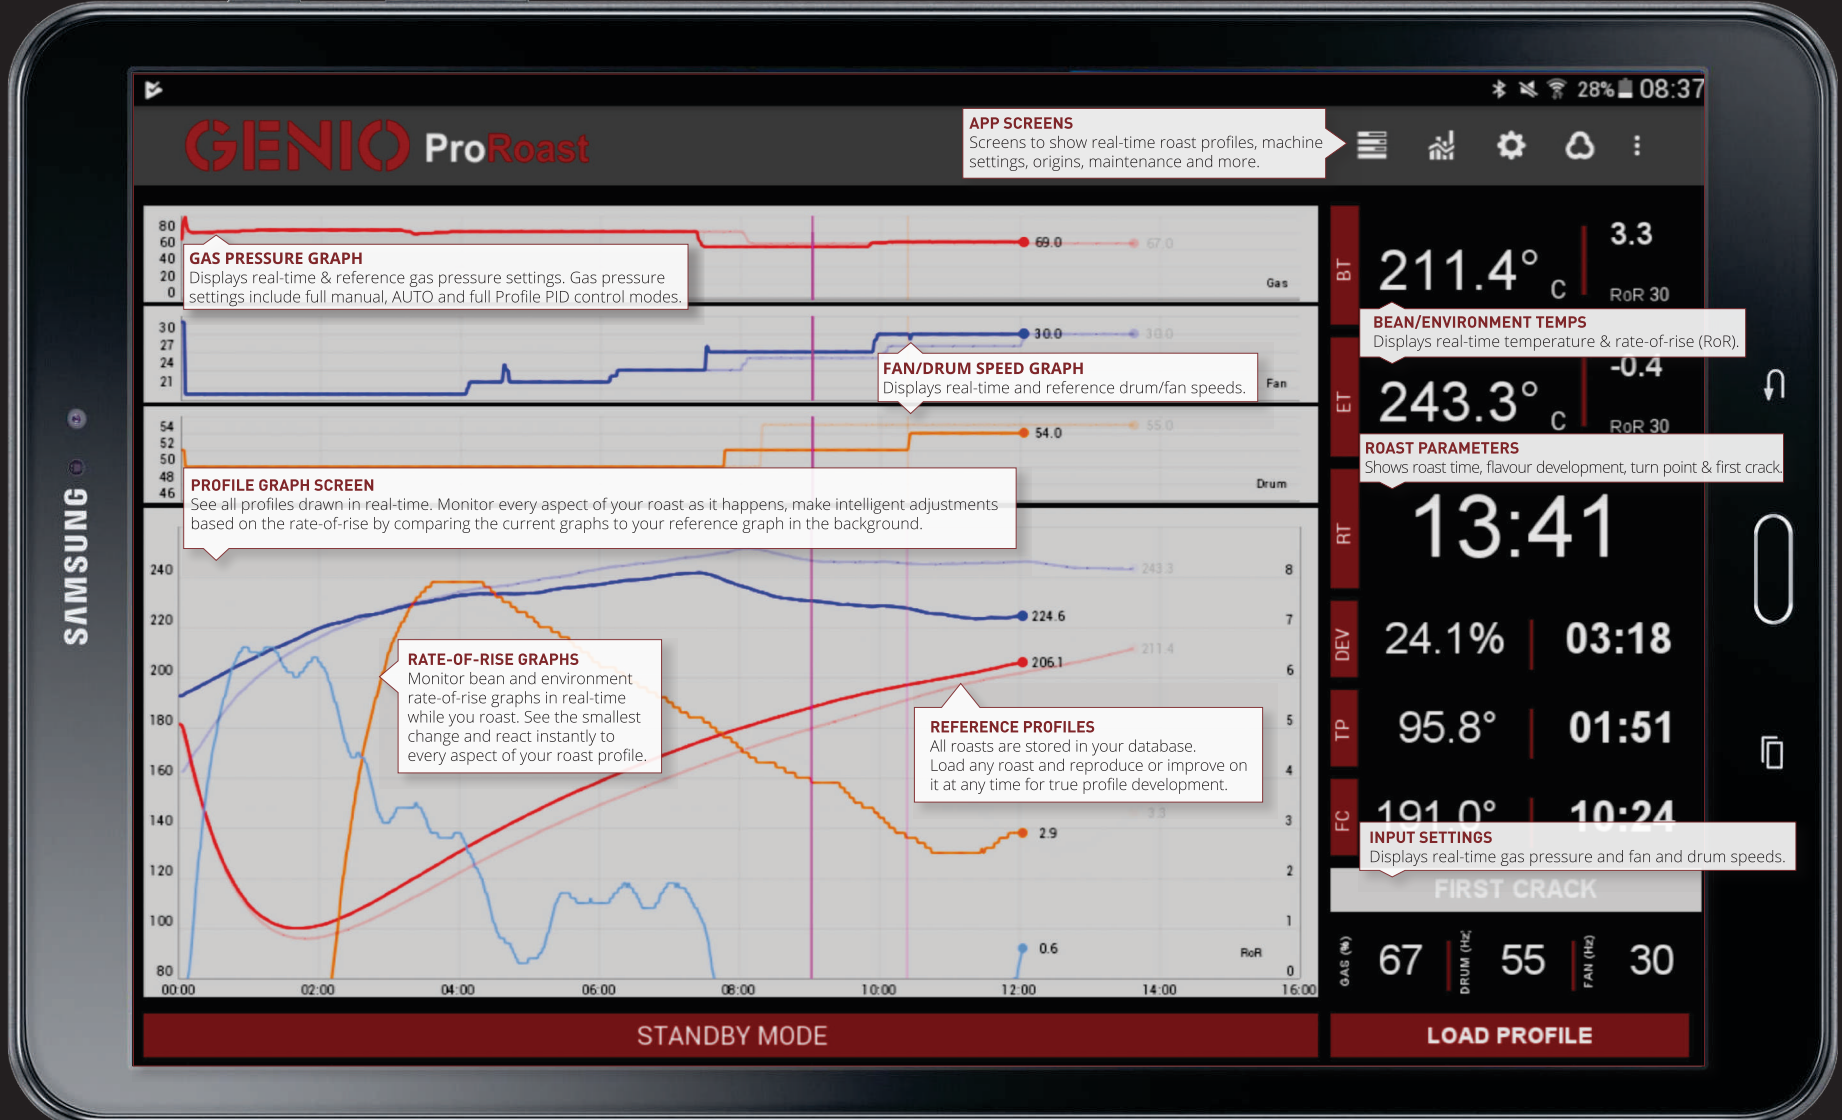

Genio Roasters has designed and manufactured high-performance hand-crafted coffee roasters since 2009 and is currently represented in more than 29 countries globally.

From powerful roaster and accessory designs to our always accessible technical support, we will change the way you think about the future of coffee roasting.

Our coffee roaster machines are ideal for micro roasting, shop and commercial coffee roasting.

### CNC MACHINED ALUMINIUM

Machined on a 5-axis CNC machine from a single block of aluminium, our control panels are stunning, functional and light-weight

#### MODE SELECTOR

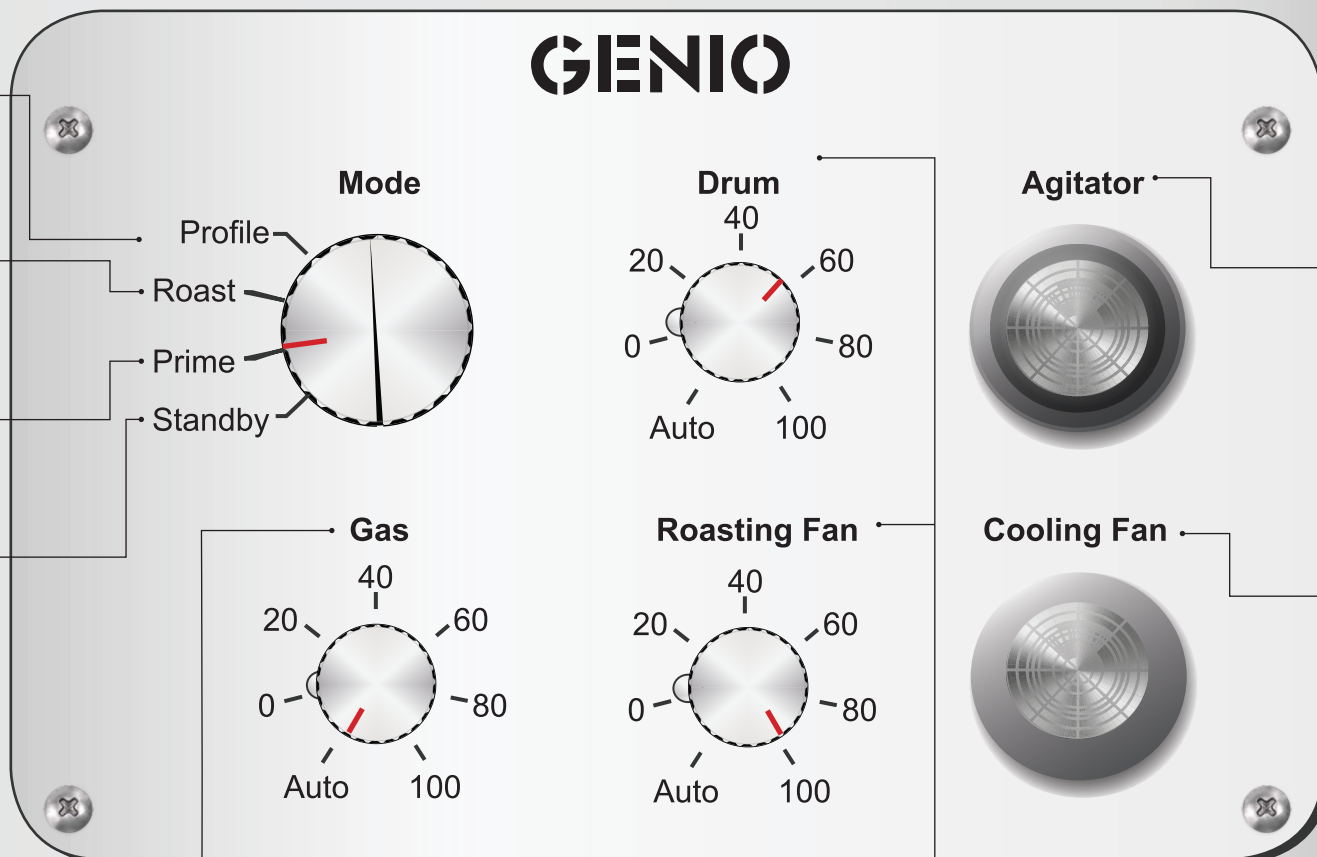

Adjust your roaster's operating mode:

**PROFILE** - Profile mode's computer algorithms will automatically adjust your gas burner settings to perfectly replicate your reference roast every time.

**ROAST** - This is where you drop your beans in and start roasting. All parameters are now in your control, or in the machine's control if you wish it to be.

**PRIME** - Automatically switches on all motors, ignites the gas and pre-heats your roaster to your chosen temperature.

**STANDBY** - Cool down the roaster automatically, switch off all the motors and gas and be ready to start up at any time.

#### GAS SETTING

Adjust your gas burner pressure with stepless 1% increments and perfect pressure stability. Or simply switch to AUTO mode and your reference roast's gas pressure setting will be copied exactly. Switch in and out of AUTO and Manual mode during a roast as you wish.

#### FAN AND DRUM SETTINGS

Adjust your fan/drum speeds with stepless 1Hz increments. Or simply switch to AUTO mode and your reference roast's fan/drum settings will be copied exactly. Switch in and out of AUTO and Manual mode during a roast as you wish.

**AGITATOR**  
Switch on the agitator to stir your beans gently during cooling. Soft start controllers and spring-loaded Teflon scrapers ensures gentle handling of your beans.

**COOLING FAN**  
Cool down your beans within 4 minutes with our state-of-the-art, speed controlled high performance fan technology.
