In the summer, slimming down and firming up are the main goals for a woman, especially in the most critical parts of the body.

Eisenberg comes to the rescue, proposing the essential duo for this task, composed of *Sérum Amincissant Corps* and *Soin Liftant Corps*.

Two ideal products to improve areas of the body that are resistant to any diet or treatment.

They help to reduce the presence of cellulite and drain the adipose tissue.

They decrease the visibility of stretch marks and deeply smooth and tone the skin.

A more toned and slimmer body every day!

SERUM AMINCISSANT CORPS

Fluid serum-gel with immediate absorption that works deeply on your body, day after day, visibly remodeling areas with adiposity and cellulite.

Highly concentrated in active ingredients that act on lipolysis and tissue drainage thanks to a *Complexe Sculptant Exclusif*, it stimulates lipid catabolism, thus facilitating the reduction of excess fat and water retention.

Removing fat and cellulite from rebel areas is no longer a dream!

Price: €105.00 - 150ml

SOIN LIFTANT CORPS

A pleasant cream treatment to be applied every day alone or after the *Slimming Body Serum*

to tone the areas affected by loss of tone or stretch marks.

Regenerating, soft, delicate but rich, this cream enhances cellular vitality thanks to the antioxidant power of vitamins E and C, associated with the *Trio-Moléculaire®* formula.

Ultra-firming, rich in green microalgae oligopeptides, it strengthens skin elasticity and visibly reduces the appearance of stretch marks.

Price: €137.00 - 150ml
