## TROPICAL RATTAN COLLECTION

Inspired by the tropical sun and materiality found in nature, the rattan is a compilation of curves. Woven by hand from the natural material by Indonesian craftspeople. The flexibility of rattan – its ability to be bent and shaped at will – is at the heart of House of makana's vision for the tropical collection. The rattan flexes under the weight of the sitter, adding another layer of support as it adapts to the contours of the body.
