

Installation Guide: Tuscan Concrete Dining Table

READ THROUGH ALL THE INSTRUCTIONS CAREFULLY BEFORE YOU BEGIN
INSTALLING YOUR BLEND CONCRETE DESIGN TABLE

01

Use a dry cloth to wipe the top of the base and the under side of the concrete tabletop. You will see that there is a circle drawn on the underside of the tabletop. This circle is a guide to help you position the base. Be careful not to wipe it off.

02

TOP VIEW OF BASE

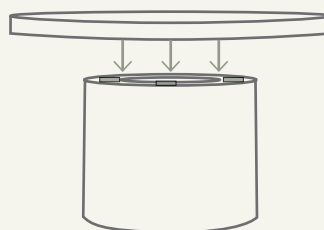

Peel off the adhesive sticker from each foam strip and apply them to the top of the table's base.

Optional:

- You can also apply a bead of silicon in the areas between each pad for a more permanent construction.
- These foam strips can also be attached to the bottom of the table's base to prevent the concrete from scratching delicate floor surfaces.

03

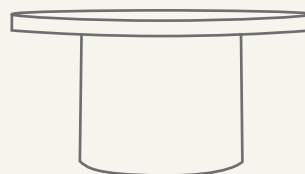

When performing step 03 please be aware that the tabletops can weigh up to 145kg. Make sure that you have a sufficient number of people to help with the lift and positioning. Remember to use best practice lifting techniques when you lift the tabletop.

Use the circle drawn on the underside of the table as a guide. It is important that you position the base inside this circle so that the base is in the centre of the tabletop.

Lift the tabletop and place it on the base.

04

Once the tabletop has been placed on the base, check that it is positioned within the circle drawn on the underside of the tabletop. If required, adjust the tabletop so that it is positioned within the circle.

blend. CONCRETE DESIGN

Warranty is void if customer:

- fails to follow the method outlined in the installation guide
- fails to place the base within the circle drawn on the underside of the tabletop
