

Squeegit® Applications

Our versatile application tool is compatible with a wide range of major manufacturers' films, including 3M, Avery Dennison, APA, Oracal, and more. It covers a broad spectrum of vinyl market applications, from vehicles and Fasara to watercraft, commercial graphics, signage, aircraft, and even 3M Dinoc interior vinyl. With its user-friendly design, it enables effortless one-handed operation for both vinyl application and cutting. What truly sets it apart is its exceptional precision, delivering clean and accurate cuts along a fixed edge, leaving a perfect ¼-inch spacing – making it the ultimate tool for professionals in the vinyl film industry.

Original Tools From An Original Wrapper

Squeegit[®] tools are designed by Burl Cole, a US based vinyl installer who has spent the last 25 years wrapping everything from boats to exotic vehicles, jets, race cars, planes, submarines, drones, trucks, jet skis, luxury cars and just about anything else that stood still long enough. During that time he learned more than a thing or two about how to increase his productivity without sacrificing the remarkable results he was internationally known for. Squeegit[®] tools have been created to embody those ideas and make them available to the professional vinyl installers of today.
