

# VERSACUT PRO 9MM 70° BLADE

Ideal for the professional film installer, vinyl wrapper, vinyl wrapper, commercial craftsman or hobbyist. This 9mm blade offers the following advantages:

- Dual cutting edges to increase cutting life
- 70 degree angles providing 20 blade segments for more cutting efficiency
- Stainless steel construction for long life
- Fits in any standard 9mm or 18mm safety knife
- Offers both right hand and left hand cutting ability

The dual edge cutting is ideal. One blade edge for rough cutting of material & the other edge for precision cutting of film or weeding.

The blade fits in your standard 9mm industry knives including the NT Cutter & Olfa knives for the seasoned pro.

# FLYP PRECISION 9MM 30° BLADE

- 30° angle allows for precision cutting
- Blade glides smoothly with no snagging
- Double blade for longer cutting productivity
- Fits in most standard 9mm retractable precision knives

The Flyp Blade is an Xacto style blade that is sharpened on opposite ends. This unique blade is a first in the industry & provides precision cuts & blade longevity.
