

Introducing Squeegit™

Combining a squeegee and cutting blade into one tool to make vinyl installs smoother and more efficient than ever.

- ▶ Unique slider locking mechanism to prevent accidental blade release
- ▶ Two shore grades – rigid earth-friendly wood composite plastic and soft flexible plastic
- ▶ Precision manufactured with tight tolerances to allow accurate cuts
- ▶ Seamless, predictable connection between hand & tool
- ▶ Tool reliability and trustworthiness – built to last in the USA
- ▶ The snap off blade is standard 9mm allowing for more cuts between changes and can be replaced

SQUEEGIT™
by Burl

Original Tools From An Original Wrapper

Squeegit™ tools are designed by Burl Cole, a US based vinyl installer who has spent the last 25 years wrapping everything from boats to exotic vehicles, jets, race cars, planes, submarines, drones, trucks, jet skis, luxury cars and just about anything else that stood still long enough.

During that time he learned more than a thing or two about how to increase his productivity without sacrificing the remarkable results he was internationally known for. Squeegit™ tools have been created to embody those ideas and make them available to the professional vinyl installers of today.

Applications of using the Snap Blade Squeegit

- Suitable for all major manufacturers' films - 3M, Avery Dennison, APA, Oracal and all vinyl market applications including – vehicle, Fasara, water crafts, commercial graphics and signage, aircrafts and 3M Dinoc interior vinyl.
- Allows for one hand operation for vinyl application and cutting.
- Provides precision cut along fixed edge to leave ¼" spacing.
- Squeegit's rigid wood composite blade edge can be sanded with 120 Grit abrasive to ensure a smoothen edge at all times. It can also be shaped with angles for specific applications.
- 6 Snap 9mm blades can be ordered as replacement blades.
