BOOMBOX INSTALLATION 2023

INSTALLING THE BOOMBOX BAG ON A LONGTAIL REAR RACK

Please note:

Each BoomBox bag is identical. There is no left side bag or right side bag.

01

Remove any bag system you have installed.

The 8 areas marked in RED are where the BoomBox will attach to when using the All-in-one-racks. For all other racks without a pannier rail installed you'll attach the BoomBox at the 4 red squares on the sides and bottom and the blue square in the center.

02

It's easier to start with the 4 tabs on top, going one by one down the pannier rail. Open the velcro tabs and fold the top tab over the pannier rail.

03

Pull the velcro tab tight and press into the loop side of the velcro on the rear of the bag.

04

Fold up and secure the bottom tab of velcro and repeat with the other 3 tabs along the pannier rail.

05

Wrap the rear velcro loop around the All-in-One rack, thread through the plastic ring, and fold back on itself to secure. Repeat on the front velcro loop.

06

Wrap the rear underside velcro loop around the frame, thread through the plastic ring, and fold back on itself to secure. Repeat on the front underside velcro loop.

07

You have successfully installed your BoomBox!

Care & Maintenance

If the BoomBox Bag becomes dirty, it can be gently scrubbed with a washcloth and soap and water. Hand wash only and air dry.
