MAGICCARPET MANUAL 2021

01 POSSIBLE MAGICCARPET CONFIGURATIONS

One MagicCarpet

Two MagicCarpets

**One MagicCarpet in back
One child seat in front**

**One MagicCarpet in front
One child seat in back**

Please note

When carrying a passenger on the back deck of an Xtracycle, be sure a set of bags or wheelskirts is properly installed to protect the passenger's feet.

O2 INSTALLING ONE MAGICCARPET WITH NO CHILD SEATS

02 A

When placing the MagicCarpet on the RearRack, the end of the MagicCarpet with the stitched Xtracycle logo is the back end of the pad.

02 B

Undo the hook and loop straps and slide them out of the plastic rings so they are long and hanging off of the MagicCarpet. Place the MagicCarpet on the rear deck.

02 C

Thread the long end of the MagicCarpet fastening strap down and between the deck and the horizontal support bar. With your fingers now underneath the horizontal support bar, grab the strap and pull it back towards you.

02 D

Bring the strap back up towards the MagicCarpet and thread it up through the D-ring sewn onto the pad. The strap should now be looping under and around the horizontal support bar of the RearRack.

02 E

Gently pull up and then cinch down the strap. When at the desired tension, press the strap onto itself to secure it in place. To complete the installation, repeat steps 02 C - 02 G for all the straps.

03 INSTALLING TWO MAGICCARPETS OR A MAGICCARPET & CHILD SEAT

03 A

If a Hooptie or two SnackBars are installed on the RearRack, you can install MagicCarpets following these steps.

To install two MagicCarpets or a MagicCarpet on the front of the deck only, position a MagicCarpet on the deck so that the back end is on the center of the rear deck. Front half will fold up and along the inside of the Hooptie or SnackBar bracket.

03 B

To attach the hook and loop straps to the horizontal support bars, follow steps 02 C - 02 G.

03 C

To attach them to the bracket, simply loop the straps around the vertical bracket supports.

03 D

To install a second MagicCarpet or a MagicCarpet on the rear end only, position the front of the second MagicCarpet to start where the first MagicCarpet stops or in the center of the deck.

Care & Maintenance

If the MagicCarpet becomes dirty, it can be gently scrubbed with a washcloth and soap and water. Hand wash only and air dry.
