### Errors & Omissions

In the interest of continuing design and development and product improvement, Kristen reserves the right to change colour, designs and product specifications without prior notice.

### Prior Compatibility

Whilst the majority of Kristen Bathrooms products are compatible, care should be taken on product selection prior to ordering to avoid installation issues. Technical drawings are available on request.

### General

The colours and finishes reproduced in this brochure are as accurate as the photography and printing process allows but may vary from the actual colours. Product size stated are nominal and should be checked against the product. It is strongly advised that all bathrooms are well heated and ventilated. It is the responsibility of the individual installer to ensure that these products are fitted correctly and in line with the instructions provided. Failure to comply with the recommended fitting instructions will invalidate the guarantee.

### Easy Installation

All furniture ranges incorporate a factory fitted hanging system that allows safe and simple installation. Please ensure the correct wall fittings are used on solid and stud walls. Some furniture products are reversible for left and right-hand door opening.

### Installation Notes

When installing a wall hung pan or wash basin, please ensure that appropriate fixings or suitable framework are used. When purchasing a wall hung pan, wash basin or bidet on its own Kristen Bathrooms do not supply any fixings. We strongly recommend all furniture and ceramics be fitted to a tiled surface, not tiled up to, this will assist any future maintenance. Due to the weight of some products, you must ensure that the walls to which fixing is to be carried out are of a suitable construction to support the product.

### WC and Basin Ceramics

Vitreous China is an extremely hard, non-porous product; but it is also breakable and therefore must not be put under stress during installation. Basin waste fittings if over tightened will create stress within the ceramic material which may in time cause the failure of the product. Waste fittings should be carefully sealed in sanitary silicone and the back nut hand tightened, one additional and final quarter turn using a suitable spanner is sufficient to create the required watertight seal. Care should also be taken when fitting brassware to tap platforms in order to prevent similar stress related failures.

All products should be inspected before attempting installation.

### Care and Cleaning

Furniture, ceramics, glass, accessories and radiators are made to the highest standards, by following the simple guidelines below will provide you with many years of enjoyable service.

#### General:

NEVER use products containing bleach, caustic soda, cleaners of a gritty or abrasive or so called "glass and mirror" cleaning products.

#### Furniture:

Apart from regular wiping off the furniture units can be cleaned with a moist soft or microfiber cloth. Any stubborn marks can be removed with diluted mild detergent e.g. washing up liquid.

#### Mirrors, Cabinets and Light Fittings:

Clean only with a microfiber cloth, NEVER use "glass and mirror" cleaning products.

#### Sanitary ware, toilet seats, glass, brassware and ceramics:

Sanitary ware/ceramics should be cleaned after use by applying a little cream-type cleaner using a sponge or damp cloth and rinsed thoroughly with clean water. In hard water areas a good quality lime-scale remover can be applied. Toilet seats should only be cleaned using a diluted mild detergent e.g., washing up liquid or warm non-abrasive soapy water, products containing bleach can lead to staining. Toilet seat hinges should be cleaned ONLY using a moist soft or microfiber cloth. Any stubborn marks can be removed with diluted mild detergent e.g., washing up liquid.

### Towel Warmers & Radiators:

Towel warmers/ Radiators should be cleaned when cold with a moist soft or microfiber cloth. Any stubborn surface or oxidation marks can be cleaned with Maas Polishing Crème.
