**ANATOMY**

**PizzaDome System**
- BaseCamp Lid
- Pizza Stone
- Triangle Base
- Air Vents
- CoolTouch Silicone Handle
- Thermometer

**BaseCamp (for reference, sold separately)**
- Gril Grate
- Grill-to-Boll Lever
- Flame Spreader
- Carrying Handle
- Powerpack Temperature Indicator
- Battery Indicator
- Burn Chamber
- Faw Entry
- Fuel Rack
- Ash Tray
- Faking Legs

**1.1**
Set up:
1. Remove the BaseCamp’s Grill Grate (fig. 1.1) from its cockpit.
2. When starting your fire, keep the Grill-to-Boll Lever in the CLOSED position (fig. 1.2). This will add in spreading the flames for even cooking.
3. Place the Triangle Base on top of the Flame Spreader (fig. 1.3).
4. Place Pizza Stone, centered sideways, on top of the Triangle Base (fig. 1.4).
5. DO NOT place the Lid on the cockpit until your fire is strong as this will cut off airflow and make firestarting more difficult.

**1.2**
Cooking:
1. When you fire registers a minimum of 3 EU3 on the temperature dashboard of your BaseCamp (fig. 2.1), place the Lid on top to begin heating up your Pizza Stone (fig. 2.2).
2. Allow 5-10 minutes for the Pizza Stone to heat up with the Lid ON before use.
3. Your Lid comes with a built-in thermometer (fig. 2.3) so you can measure the temperature of your cockpit for pizza making and other cooking activities. For pizza-making, we recommend you achieve a minimum temperature of 400°F Fahrenheit.
4. Place pizza directly on Pizza Stone and cover with Lid. Baking time is approximately 15-20 minutes, depending on the strength of your fire.
5. COOKING TIP: The Lid of the PizzaDome System is also a great way to retain heat for cooking meats and vegetables and can be used independently of the flame spreader and Pizza Stone. The built-in thermometer can help you gauge the proper temperature for your needs.

**1.3**
WARNING: Contents will be extremely hot and may present a burn hazard. Use caution when moving food or components. Use a heat-proof utensil when handling food on pizza stone. When moving BaseCamp Lid, touch Silicone Handle only.

**1.4**
Cooling:
1. Once your fire has burned down to ash, allow an additional 10-15 minutes for your Pizza Stone to cool down before touching.

**CAUTION:** Do not try to remove the Pizza Stone while fire is still burning and BaseCamp Lid in use.

**2.1**
**Firestarting**
- Smaller sized sticks and kindling are ideal ways to get the fire started. Starting with larger sticks will result in a lot of smoke and may not effectively start the fire. Solid Firestarters are included in your box and can create a more dependable fire. Do not use liquid accelerant to start your fire. Tip: Smaller sized fuel is ideal for grilling.

**Building Up**
- As the flame catches, larger sticks or strips of firewood can be placed into the mouth of the stove. These will help build a coals bed and bring up the overall temperature of the stove.

**Strong & Ongoing**
- As your fire builds to a sustained strength and a coals bed is formed, you can use larger pieces of wood such as branches up to 1 1/2 inches in diameter or split pieces of firewood. However, it is important to never crowd the burn chamber. This will not create a better fire.

**2.3**
**Cooking tips:**
- Never leave PizzaDome System unattended when hot or in use. Do not move Base or Stone of PizzaDome System while stone is hot. Keep out of reach of children. Always use on level ground.

**4.2**
**Maintenance and Care:**
- Once your stone has cooled completely, scrape off any baked on food with a stiff, dry brush or metal scraper. You may also wipe down your stone with a damp cloth.

**Note:** Do not submerge your stone in water. We do not recommend washing it with soapy water – your stone is porous and will take on the flavors of your cleaning agent.

**2.4**
- Store in a cool, dry area when not in use.

**Danger:**
- BURN HAZARD: Metal and ceramic on PizzaDome System will be hot when stone is operating and present a burn hazard. Flames may be large. Never leave PizzaDome System unattended when hot or in use. Do not move Base or Stone of PizzaDome System while stone is hot. Keep out of reach of children.

**Read, Understand, and Follow All Instructions and Warnings in this Manual Before Operating the PizzaDome System. Failure to comply with the precautions and instructions provided with these stoves can result in property loss or damage, serious bodily injury or death. Only persons who can understand and follow the instructions should use this accessory. Contact BioLite with any questions about safety or operation.

**Warranty:**
- BioLite reserves the right to determine if the problem is due to manufacturing flaw. If so, BioLite will repair or replace the unit at its discretion and return it to you, free of charge. This warranty does not cover any damage or malfunction arising from misuse, improper maintenance, negligence, normal wear and tear, or accident. The BioLite PizzaDome System may only be used as a cooking accessory and is intended for use with the BioLite BaseCamp Stove only. This product is not designed for cooking on grills or in fireplaces. This warranty gives you specific legal rights. You may also have other rights that vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusions or limitations may not apply to you.
