EMBRYONIC PLANT TISSUE EXTRACTS FOR ORGAN SYSTEMS TOXIN  
ELIMINATION TOWARD THE EMUNCTORIES

UNDA is a world-renowned homeopathic brand founded in 1949 in Harzé, Belgium. Its diverse product line includes single-ingredient and combination homeopathic remedies, topical creams, tablets, and natural health products. UNDA products are formulated using a combination of GMO-free plant, mineral, and organic raw materials obtained primarily from local sources.

UNDA employs a number of key quality assurance procedures to ensure the safety and efficacy of each of its homeopathic products. All UNDA products are manufactured in compliance with EU Guidelines for Good Manufacturing Practice (GMP) for Medicinal Products for Human and Veterinary Use. UNDA uses a combination of Hazard Analysis and Critical Control Points (HACCP) processing techniques and extensive safety testing.

Products are thoroughly tested to verify that they are free of microbes, mycotoxins, pesticides and heavy metal contaminants. UNDA also conducts rigorous quality testing to confirm that the appropriate concentrations of homeopathic ingredients are present in its products.

Their laboratory analyses include 3D fluorescence spectroscopy, chromatography, and infrared spectrometry, among others.

### The UNDA Philosophy

UNDA incorporates the fundamental principles of homeopathic medicine, as founded by Samuel Hahnemann:

1. Do no harm
2. The body is capable of self-regulation
3. Physiology prevails over pathology
4. Restoring the individual's physiology is essential to healing his or her pathology
5. The four pillars of health must also be taken into account with equal value given to: diet, drainage and elimination, psychological equilibrium, and balancing of the hereditary characteristics

### Our Environment: Your Toxic Exposure

In our modern world, we are exposed to a variety of chemicals in the air that we breathe, the food and drink we consume, the surfaces that we touch, and the products that we use. These toxins may adversely modify a biological system.

### Physiology Prevails Over Pathology

Supporting the body in removing toxins at both an intracellular and extracellular level is a long-lasting and deep-acting way of maintaining health.

### Detoxification

Elimination is a normal physiological function of the body and one of the four pillars of health: diet, drainage and elimination, psychological equilibrium, and balancing of the hereditary characteristics. Detoxification forces physiological functions, which may lead to a physiological disequilibrium.

<sup>†</sup> Homeopathy, Phytotherapy, Gemmotherapy, Oligio-elements and Schüssler Salts are modalities used in traditional medicine. Traditional uses are based on the Materia Medica and are not supported by clinical trials. These therapies are not substitutes for standard medical care. Practitioners are solely responsible for the care and treatment provided to their own patients.

# Gemmotherapy Macerates

Gemmotherapy uses the extracts of fresh buds and young shoots from developing plants, where the plant's life essence is at its peak in the young growths. Gemmotherapy remedies are prepared in a natural glycerin and organic ethanol medium, which is then filtered and potentized at a 1/10th dilution (1X Hahnemannian). This methodology captures the most complete set of highly concentrated active constituents necessary for tissue regeneration, favourable growth development and essential drainage properties. Gemmotherapy supports detoxification, tissue regeneration and repair.

## Leaders in Homeopathy for over 50 years

Established over half a century ago in Belgium, UNDA is renowned for exceptional homeopathic products that use only pure materials and herbs that are biodynamically grown or wildcrafted.

### Numbered Compounds

UNDA Numbered Compounds are unique remedies synergistically formulated with plant constituents that target and carry potentized metals to specific organs where enzymatic and metabolic functions are carried out on a cellular level helping to facilitate the drainage of toxins. UNDA Numbered Compounds are the only complex remedies of their type, formulated with both plants and metals, acting on organotropic and energetic sensitivity levels respectively. Each remedy has its own fingerprint and is combined synergistically based on the integrated principles and theories of anthroposophy, oligotherapy, botany, Traditional Chinese Medicine and homeopathy. UNDA Numbered Compounds work on a physiological and terrain level, making them an excellent addition to practitioners prevention and treatment armamentarium.<sup>†</sup>

### Schuessler Salts

Schuessler Tissue Salts act on the cellular level to balance and restore cell function. UNDA Tissue Salts are prepared using methods based on Dr. W. H. Schuessler Biochemical System of Medicine (in accordance with the German Homeopathic Pharmacopeia [HAB]).<sup>†</sup>

### Gammadyn

Oligotherapy is a method of furnishing the body with the ions it cannot synthesize and which are indispensable for cellular enzymatic functions. This functional therapeutic modality requires the use of trace elements in precisely measured, small doses in a highly bioavailable form. These trace elements are co-factors in a multitude of biochemical reactions where they accelerate the speed of these reactions without ever modifying the important equilibrium that exists and that must reign within the body to maintain optimum health. UNDA Gammadyn Oligo-Elements are: convenient, effective, highly stable, highly bioavailable and great-tasting.<sup>†</sup>

### Plexes

Plex Remedies are condition-specific homeopathic specialties prepared in low dilutions and are recommended for acute and chronic ailments. The product range helps support: the digestive, hormonal, immune, musculoskeletal, nervous, respiratory, skin, oral and vascular systems. Products come in a variety of formats: creams, liquids, sachets and dissolvable tablets.<sup>†</sup>
