

MEASUREMENTS

*Ensure there is sufficient support installed in-wall.

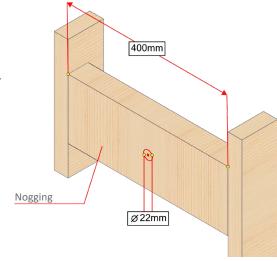

*Ensure there is 16-18mm exposed thread.

Install Nogging within the wall between the wall studs and flush with the front face.

Drill a ø22mm hole through the Nogging in the appropriate location.

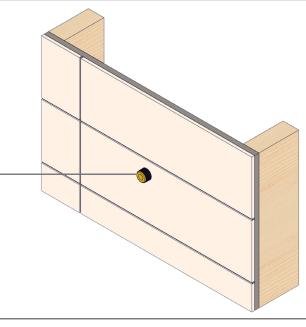

В

Install the G1/2" cold water supply. Ensure pipe is secured to Nogging.

IMPORTANT: G1/2" thread must be between 16-18mm from the face of the finished wall.

G1/2" Threaded Nipple

recommended working pressure

150-500KPa

maximum hot water temperature

75 degrees

NOTE:

- If the pressure exceeds or is likely to exceed 550kpa, an approved pressure limiting device must be
- Flush out all pipe work prior to installation.
- Fit the water temperature exceeds 75°C, an approved tempering valve must be fitted.
- Installation should comply with Australian standard AS3500.1 or relevant local authority requirements. Showers may not be suitable for use within:
- Gravity-fed water systems

- Some instantaneous hot water systems; or
- Pressure supply less than 150kPa; NOTE: The 500kPa maximum water supply pressure does not apply to fire service outlets.

Failure to comply with the above may void all warranties.

VARRANTY:

Please refer to the full warranty statement enclosed with the product before installing.

MAINTENANCE AND CARE:

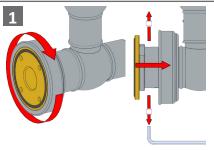

- Chrome plated surfaces should be cleaned with mild liquid detergent or soap and water.
- Do not use cream cleaners or citrus based cleaning products, as they are
- Use of unsuitable cleaning agents may damage the surface. Any damage caused in this way will not be covered by warranty.

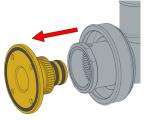

DISCLAIMER:

While we aim to ensure the specifications shown are correct at the time of printing, we reserve the right to make modifications without prior notice. Always use the physical product measurements for mark-ups and roughing-in as the line drawing shown may differ from the actual product over time.

*All measurements are shown in millimeters.

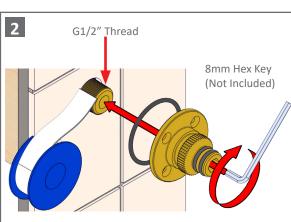

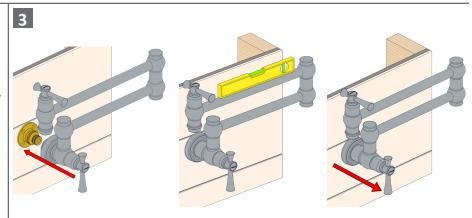

Unscrew the Dress Plate and pull it back. Remove both Grub Screws.

Remove the Wall Adaptor from the Pot Filler.

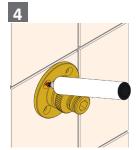

Apply Teflon Tape to the ${\rm G1/2}^{\prime\prime}$ Wall Thread and tighten with an 8mm Hex Key.

DO NOT OVERTIGHTEN.

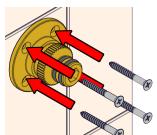

Push the Pot Filler onto the Wall Adaptor and ensure it is level when installed.

Remove the Pot Filler once level.

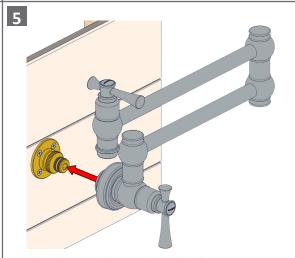

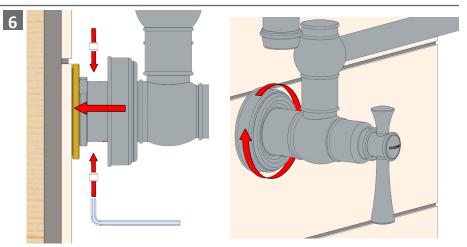

Using the adaptor, mark and drill four 5mm holes for the screws.

Screw Adaptor to the wall.

Place the Pot Filler onto the Wall Adaptor.

Re-Insert the Grub Screws, tightening the Pot Filler to the wall adaptor. Screw on the Dress Plate.

TURN ON AND CHECK FOR LEAKS.
