Arko 120 White Gloss or White Matte

Collection: Elevate

Freestanding bath – 2 sizes – Gloss or Matte

Features

- Fine rim, elegant super-ellipse design, curved sides
- Seamless design
- White sanitary grade acrylic, excellent heat retention properties
- Suits 40 mm waste
- Adjustable support feet

Available in 2 sizes

- 1500 mm long
- 1700 mm long

Available in 2 finishes

- White Gloss, sanitary grade acrylic
- White Matte, sanitary grade acrylic

Available in 3 configuration options

- **OPTION 1** Bath with No Overflow
- **OPTION 2** Bath with Overflow
- **OPTION 3** Bath with Smartfill System (bath filler and overflow)

### Installation

Refer to installation instructions.

The bath is supplied with four adjustable support feet on the base frame of the bath. Position the bath and use the adjustable feet to level the bath. Leave a 3mm void between the base of the bath and the floor. Use silicone around the base to seal the bath to the floor. Allow a 20mm gap in the silicone seal as a weephole (gap is designed to reveal any plumbing leakage).

Use acetic cured silicone sealant. Do not use epoxy type adhesives.

Planning Guide for baths to be installed with

Smartfill®

Bath filler + overflow by Seima

Smartfill system includes FlexiWaste overflow kit with Pop-out bath waste
Smartfill Planning + Pre-lay Guide

The plumbing set-up for Smartfill normally requires advance planning, to place the plumbing inlet and outlet in the best positions for your bath location.
The Smartfill system simply requires the plumbing to be placed under the bath within the bath footprint:

- **Water Inlet Point**
  ½" BSP nipple — to protrude a minimum of 30mm above FFL (finished floor level).

  (This water point will be controlled via a wall mixer or other tapware, to fill the bath.)

- **DWV Bath Sewer Point**
  Water outlet

The water inlet nipple and waste outlet pipe can be placed anywhere within the footprint of the bath and there must be sufficient clearance for connection pipes. The recommended distance between the Water Inlet Point and DWV Point is around 200mm but this is not essential.

Bath footprint to include:
• Water inlet point
• DWV bath sewer point

DWV outlet   ~200
Ø ½" BSP nipple water inlet

Recommended distance apart: ~200mm

Smartfill bath filler + overflow system

Wall tap controls water inlet

Water flow into bath
Overflow inlet

Pop-out waste

DWV outlet

Water inlet

Smartfill has two elements of backflow prevention built in to the device. Smartfill passes AS2845:2:1996 for backflow prevention with included air gap and also has a dual check valve (DualCV). WM Cert 23422.
