Not included accessories

SFLK1

Child lock

PRTX

Refractary pizza stone with handles. D=35cm Not suitable for microwave ovens. Suitable for gas ovens, to be put on the griddle.

Cover strip for hob back side, suitable for 90 cm Concerto cookers

KITP90X9

Splashback, 90 cm, stainless steel, suitable for pyrolytic Concerto cookers

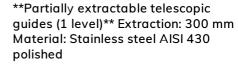

Stainless steel grill plate suitable for 90 cm Concerto cookers

PALPZ

Pizza shovel with fold away handle width: 315mm length: 325mm

GTP

PPR9

Refractary pizza stone without handles. Squared shaped stone: L64xH2,3xP37,5 cm Suitable also for gas ovens, to be put on the griddle.

BG6090-1

Cast iron grill plate suitable for Concerto cookers

KITH95

Height extension kit (950 mm), stainless steel

KITPDQ

Height reduction feet (850 mm), stainless steel, for cookers

GTT

Totally extractable telescopic guides (1 level) Extraction: 433 mm Material: Stainless steel AISI 430 polished

SMOLD

Set of 7 silicone moulds for ice creams, ice lollies, pralines, ice cubes or to portion food. Usable from -60°C to +230°C

Symbols glossary (TT)

	Ε.
•	_

Heavy duty cast iron pan stands: for maximum stability and strength.

Air cooling system: to ensure a safe surface temperatures.

Quadruple glazed: Number of glazed doors.

Enamel interior: The enamel interior of all Smeg ovens have a special antacid lining which helps keep the interior clean by reducing the amount of cooking grease adhering to it.

Circogas: In gas ovens the fan distributes the heat quickly and evenly throughout the oven cavity, avoiding flavour transfer when cooking a number of different dishes at the same time. In electric ovens this combination completes cooking more quickly of foods that are ready on the surface, but that require more cooking inside, without further browning.

Fan with upper and lower elements: The elements combined with the fan aim to provide more uniform heat, a similar method to conventional cooking, so pre-heat is required. Most suitable for items requiring slow cooking methods.

Upper and lower element only: a traditional cooking method best suited for single items located in the centre of the oven. the top pf the oven will always be hottest. Ideal for roast, fruit cakes, bread etc.

Circulaire: The combination of the fan and circular element around it gives a hot air cooking method. This provides many benefits including no preheat if cook time is more than 20 minutes, no flavour transfer when cooking different foods at the same time, less energy, and shorter cook times. Good for all types of food.

ECO: The combination of the grill, fan and lower element is particularly suitable for cooking small quantities of food.

Grill element: Using of grill gives excellent results when cooking meat of medium and small portions, especially when combined with a rotisserie (where possible). Also ideal for cooking sausages and bacon.

Half grill: For rapid cooking and browning of foods. Best results can be obtained by using the top shelf for small items, the lower shelves for larger ones, such as chops or sausages. For half grill heat is generated only at the centre of the element, so is ideal for smaller quantities.

Fan with grill element: The fan reduces the fierce heat from the grill, providing an excellent method of grilling various foods, chops, steaks, sausages etc. giving even browning and heat distribution, without drying out the food. The top two levels recommended for use, and the lower part of the oven can be used to keep items warm at the same time, an excellent facility when cooking a grilled breakfast. Half grill (centre portion only) is ideal for small quantities of food.

Circulaire with upper and lower elements: The use of the fan with both elements allows food to be cooked quickly and effectively, ideal for large joints that require thorough cooking. It offers a similar result to rotisserie, moving the heat around the food, instead of moving the food itself, enabling any size or shape to be cooked.

All glass inner door: All glass inner door, a single flat surface which is simple to keep clean.

The inner door glass: can be removed with a few quick movements for cleaning.

Side lights: Two opposing side lights increase visibility inside the oven.

Pyrolitic: Pyrolitic cleaning cycles can be selected as necessary to automatically clean the oven interior.

The oven cavity has 5 different cooking levels.

SMEG SPA 8/05/2023

Telescopic rails: allow you to pull out the dish and check it without having to remove it from the oven entirely.

Ultra rapid burners: Powerful ultra rapid burners offer up to 5kw of power.

The capacity indicates the amount of usable space in the oven cavity in litres.
