BENEFITS

Understanding new capacity and energy ratings
From the 15th August 2021, the way refrigerators are tested to calculate Energy Star Ratings and energy consumption have changed. This means that the capacity and energy rating calculations have changed, however the product remains unchanged. Be sure to check all new ratings to ensure that your comparisons are consistent with the new standards.

Reversible door
The door is reversible so that it may be positioned as either left or right hand side opening

Dimensions

Minimum Recommended Airspaces

Before you move your appliance into the place where it will operate, check that it will have adequate clearance. Clearance is required for air circulation and too little clearance may affect the performance of your appliance.

We recommend minimum clearances of:

- 30mm on each side.
- 30mm above the refrigerator.
- 50mm minimum/75mm maximum behind the refrigerator.

Please note: Doors are designed to sit proud of cabinetry (not flush). The clearances shown above are the recommended minimum clearances. The clearance at the rear must not exceed 75mm.
