

*We cultivate
the tradition*

Monte Castello

In 1985 Bruno Fedeli founded the Azienda Agricola Monte Castello in Serravalle di Chienti, in the heart of the province of Macerata, and has been producing for 30 years pulses and cereals in keeping with the great tradition which Father Zeno passed to him.

Agricultural land is mainly cultivated in Marche, Umbria, Tuscany, to which are added plots in Puglia and Piedmont. All the agricultural production is obtained in the strict compliance with “integrated production specifications” for combine the need to safeguard environmental resources with the aim of improving the technical and economic aspects of agri-food products and to defend human health.

The commitment of the Monte Castello then continues in the strict control of activities of harvest, in the verification of the organoleptic characteristics and nutritional properties of agricultural products, and in the procedures of drying, selection and packaging.

The philosophy of Monte Castello is to pursue and realize the “short chain”, from production to processing and packaging ensuring the consumer a safe and controlled product.

Quality guarantee

To better understand the peculiarities of products of Monte Castello, it is necessary to illustrate the true company philosophy: the realization of the “short supply chain”, which ensures the control of all the processes that influence the

quality of the final product or the choice of varieties, the technique of cultivation and processing. Behind these processes in fact hides the great experience of Monte Castello company, fundamental to reach the great quality of its products.

*3 steps to get there
from producer to final consumer*

*Production,
Selection,
Packaging*

This supply **chain** is short, **fast**, **uninterrupted** and **safe**, these elements are fundamental especially for the nutritional qualities of the final product, as attested by the table on the label of each package, an additional guarantee of authenticity and purity certified in compliance with the regulations in force in the sector.

Our Certifications

INTEGRATED PRODUCTION

It's an agricultural production system that prioritizes use of natural resources and mechanisms of regulation in partial replacement of chemicals, ensuring sustainable agriculture and a lower environmental impact.

INTERNATIONAL FOOD STANDARD

IFS (INTERNATIONAL FOOD STANDARD)

It's one of the food safety standards recognised by the **Global Food Safety Initiative (GFSI)**, an international initiative, whose main purpose is to strengthen and promote food security throughout the supply chain.

THE QUALITY MARK

“QM” the quality mark awarded by the Marche region to those agro-food companies operating in compliance with the specifications of production and submit the supply chain to control of accredited bodies in charge.

ORGANIC FARMING

BIO. The term **“organic farming”** indicates a cultivation method that only allows the use of natural **substances excluding the use of substances of chemical synthesis** (fertilizers, herbicides, insecticides).

Ensures control of the product and quality

the quality of the production, guaranteed by the strict respect of the disciplinary and external controls.

the traceability of each stage and the verification of the subjects involved in the production process.

the accuracy of the information, which must be exhaustive for the consumer and consistent with official publications.

pulses and cereals

The twenty food specialties of Monte Castello are productions recognizable by the brand and the long presence on the banks of the large-scale distribution:

Lentils

Chickpeas

Cicerchia

Dehusked Red Lentils

Cannellini Beans

Borlotti Beans

Black Eyed Peas

Tondino Beans

Dehusked Peas

Pearled Spelt

Pearled Barley

Dehusked Oats

Barley and Pulses Soup

Spring Soup (Spelt and Pulses Soup)

3 Cereals and Pulses Soup

Rustic Soup (Oat and Pulses Soup)

Four Seasons Soup (Mix Cereals and Legumes Soup)

Delicate Soup

Country Soup

Spelt and Lentils Soup

All pulses and cereals of Monte Castello are cultivated, processed and packaged exclusively in Italy and are essential ingredients of the culinary tradition of many countries of the world.

The nutritional characteristics and the richness in fibre, together with the absence of fats, make them precious elements for those who choose a healthy, balanced and tasty diet.

Lentils

The Lentils of Monte Castello are distinguished by the particular color, the small size of the grains and for the pleasant taste that makes them unmistakable.

They are an excellent food highly nutritious that contains: proteins, carbohydrates, calcium and iron.

Average nutritional values for 100 g of product

Pasta from Monte Castello

From the wise cultivation of our grains,
thanks to gentle and careful milling
to maintain the nutritional properties of our cereals
we obtain high-quality organic flours
of wheat and spelt 100% Made in Italy.

From the processing of these flours
we get the Pasta del Monte Castello.

Our pasta is produced thanks
to a slow and careful artisanal process
to the teachings of tradition, thus obtaining
a product: tasty, healthy and rich in nutrients.

Slow processing with quality ingredients
together with bronze drawing they bring us
to obtain a porous paste that holds
cooking and capturing at its best
various sauces and condiments.

Fundamental to guarantee excellent pasta
it is the slow drying that allows the humidity to be gradually
eliminated while maintaining it
all the organoleptic properties of the product

BIO

Pasta with wheat flour

100% Made in Italy organic WHEAT pasta is a great classic of Italian cuisine whose taste is enhanced thanks to the respect and care of the manufacturing process as tradition dictates

Sustainability

The commitment of Monte Castello in a perspective of sustainability and attention to territory, is strongly expressed in the treatment of processing waste, limiting them and valorising by-products: plant residues, for example, are destined for the livestock industry to be reused in feed production.

Environmental protection, in the company's philosophy, is not only a necessity but a value and a duty. For our life and for that of future generations.

Production

Each stage of processing of the Monte Castello is performed carefully to ensure the excellence of the product.

Range of products

Packaging

The packaging of each specialty is designed to communicate immediately the characteristics of the product. Careful in materials and colors, identifies the single range, facilitating the consumer in choice. Each package also contains a brief description and the nutrient content of ingredient and its organoleptic profile.

Private Label

The **Azienda Agricola Monte Castello** offers the production service Private Label. We provide our customers with our high quality production, 100% Italian, cultivated according to the rules of integrated and biological productions.

Thanks to our experience, our values linked to tradition and the full respect for the land and, above all, our productive flexibility we are ideal partners in the production of pulses and cereals, flours and food preserves, suitable for every field.

We put ourselves at the complete disposal of the customer to satisfy every need in order to guarantee a perfect product.

Logistics

The entire sorting and packaging cycle takes place exclusively in the company and allows to respond effectively to every request from the most small to those of considerable importance.

Each product is available in packs of grams 400 / 500 / 1000 packed in 20 carton boxes or 10 pieces each. To meet the needs of the food industry are available bags of 5 - 10 - 15 - 25 kg or Big Bags.

We manage each delivery in order to satisfy our customers according to different distribution needs.

Innovation and research

In the countryside, innovation and research are entrusted to the nature and its millennial experience.

Every year for sowing we use the seed harvested the previous year because the only one can express the best performance in our growing environments. Year after year we get increasingly selected crops and always better adapted to our environments. This allows us to have more resistant crops, less demanding of interventions as fertilization and fungal treatments and able to achieve excellent production of high quality. Increasing awareness of related issues to nutrition, health and the green world, requires appropriate attention and proposals.

The company's decades-long commitment to cultivation and environmentally friendly production, allows to respond effectively to a request that, year from year, becomes increasingly aware.

The use of the most innovative machines, such as the sorting machine optical, allows to obtain a selection of materials more and more accurate and meticulous.
