

High adventure with Yamaha Cross Tour jacket and pants

Yamaha has just released this Cross Tour jacket and matching pants, which it says are ideal for adventure tourers looking for performance, protection and comfort both on and off the tarmac.

The jacket is made from a 600 Denier polyester material with shoulder and elbow protection and Bioelastan anti-shock material. Detachable side panels reveal mesh fabric for ventilation, and both the sleeves and waist are adjustable.

There's also an attachment inside the inner back pocket for a water bag with water outlet and hole on the front, as well as a waterproof inside pocket for documents, in addition to all its other many pockets.

The matching Cross Tour pants are made from a mixture of 600 and 840 Denier polyester material. With adjustable knee protection, the pants feature stretch inserts above the knee and upper back for extra mobility, adjustable waist and leg cuffs, a non-slip insert on the seat area and zipped ventilation pockets on the upper leg and back for controlled airflow, plus zipped pockets at the hips.

Strike is happy to announce the arrival of the world's most advanced motorcycle product, the Interphone F5.

The Interphone F5 is one of the leading motorcycle communication units on the market. The F5 boasts a long intercom range (1800m), updatable software and up to 6 connections between motorcycles. It is equipped with multimedia capabilities including, FM radio with RDS, Bluetooth, streaming music, GPS instructions and TTS (Text To Speech), the Interphone F5 is sort after by motorcycle riders.

The unit is IP67 rated making it

perfect for all conditions.

Best of all, the sound quality for communication is most competitive. It uses AGC (Automatic Gain Control) to adjust the volume of the speakers depending on the level of ambient noise. It uses new energy efficient Bluetooth 3.0 technology which means it takes only 3 hours to charge and then has over 700 hours of standby time with 11 hours talk time.

The kit comes with everything

needed to get riding, quickly.

It weighs only 55grams, and it is fully compatible with the Strike Genius BT Motorcycle GPS.

Best of all - you don't need to be a brain surgeon to use it! It is simple and intuitive.

Strike stocks the entire Interphone range including F2, F3, F4 and F5.
