

## Avon Roadriders for racers

The AM20 has been the front tyre of choice for historic racers for decades, and rightly so with its fabulous grip and predictable handling characteristics. Now the AM20 has given way to the AM26 Roadrider, which is available in either front or rear fitment. For racing, the front tyre comes in the A49 compound with the 633 compound for the rear. Sizes and RRP are 90/90 x 18 front and rear (\$255.00), 90/90 x 19 front (\$280.00) and 100/90 x 19 rear (\$285.00). The 19-inch pair will be used as control tyres for the 2012 British Historic Grand Prix Championship.

## Picture this

It's amazing what you can pack into 86 grams these days. That's the weight of the Interphone HD Motion Camera that is designed to give perfect picture quality in just about any motorcycling application – and it is waterproofed and dustproofed as well. Dual bright LEDs give excellent night time results, with a laser pointer to optimise framing. Other features include an anti-vibration sensor, 12 megapixel resolution, 120 degree HD wide angle lens and up to 2.5 hours of recording time. Plug it into a TV or download it to a PC and you can relive your escapades over and over again. The Interphone HD Motion Camera retails for \$330.00 including GST and comes with a USB cable, instruction manual, mounting brackets, three installation belts of various lengths for easy mounting, protection case and an AV cable.

**It can be purchased direct from [www.strike.com.au/products/motorcycle-cameras](http://www.strike.com.au/products/motorcycle-cameras) or call 1300 792044.**
