IMMEDIATE RELEASE

Strike Group release tether lock for tablets and smartphones

BRISBANE, September 25, 2015 – Smartphones and tablets are increasingly being integrated into businesses due to their portability and applications.

With this growth in tablet usage comes the demand to secure the devices from theft, especially for businesses that use them in public spaces.

To help address this concern, Strike Group have released a Tether Locking System for smartphones, tablets, iPads and phablets. The Strike Tether Lock provides security onto almost any mobile device. It can be universally applied to any device such as an iPad, Samsung Tablet, Apple iPhone or Samsung Galaxy S6 as long as it is attached to a smooth surface. This locking system can be used in any environment, or vehicle type, to help secure your device.

Strike CEO Chris Ryan said, "The increased visibility of devices used in public areas has become a major concern for the business sector due to threats of device and information theft. This can now be addressed by using a safety locking system that will secure their devices inside their offices, stores and vehicles."

Strike Tether Locks are chrome plated with a ZDC body and a steel cable offers exceptional theft determent.
