This car kit is one of the Parrot MKi series - universally compatible with most mobile phones including Nokia, Blackberry, Samsung & LG & it's the only Apple approved iPhone car kit available in Australia!

**Your voice takes control**

The MKi automatically synchronizes the names and phone numbers in your mobile with their phonebooks and updates each time a new entry is detected.

You can also directly access the phonebook and browse all the names thanks to the voice synthesis (Text To Speech). So simple!

When you receive a call, the name and the number are displayed on the screen. To continue your conversation in a discrete mode, switch instantaneously between your Bluetooth headset and your mobile phone.

The MKi kit is delivered with a music cable specifically designed to adapt to any sort of digital and analogue music players: iPod/ iPhone connector, a USB connector to plug any USB MP3 player and a Line-In input for analogue sources. MKi also connect to any Bluetooth Stereo (A2DP) source: MP3 player, musicphone, smartphones, PDAs...The remote control gives you access to the main functions: PLAY, PAUSE, NEXT SONG, PREVIOUS SONG, and VOLUME. MKi9100 displays the playlist for you to always visualize what is played.
