

WHO WE AR

We are the makers of the Original Wood Pellet Patio Heater. Our commitment to great craftsmanship, innovation of gravity fed technologies, and manufacturing entirely in the USA are what drives us forward. Most simply, we want to bring people together and a warm fire is how we do it.

Innovation is the heart of the business. We are always looking for ways to improve our products and bring new concepts to life! Follow our journey @Timberstoves.

OUR HEATERS

LIL TIMBER

72,000 BTU Free Standing Outdoor Heater

- 10 Ft Heating radius
- 8 x 5" Fire Viewing Windows
- Non-Electric And Portable
- Safe Enclosed Flame
- Wt. 72 Lbs | Dim. 11 x 20 x 84"

BIG TIMBER

90,000 BTU Free Standing Outdoor Heater

- 12 Ft Heating radius
- 12 x 5" Fire Viewing Windows
- Non-Electric And Portable
- Safe Enclosed Flame
- Wt. 82 Lbs | Dim. 11 x 20 x 84"

SAFETY CAGE

STAINLESS STEEL

Built to withstand the elements in any climate

SAFETY MESH

Safe to touch while the stove is in operation

The New elite series of Timber Wood Pellet Patio Heaters brings performance and style into one great product, providing radiant heat while keeping the stove safe for family and friends.

* * SARAH MIKKOLA

Just picked the Big Timber heater up yesterday, came home put it together, and had a lovely, warm evening on our patio! We have had other patio heaters, but it was always a challenge to stay warm with the other products; this one puts out some serious heat, and you get the ambience of a fire without all of the smoke. The Big Timber is a very high quality, truly amazing product!

* * * SCOTT SMITH

LOVE this thing! I got my Big Timber last week and immediately put it together and did the burn-in. I did watch the YouTube assembly video and after that the build was very easy/intuitive. Since then we have used it almost every night and found that I could be on the couch outside in front of it without a jacket at all with temps in the the mid 40s. The thing is a beast – extremely well built, throws a TON of heat and it is literally the talk of my neighborhood. It totally transformed my outdoor space.

* * BRIAN MILLER

Cant say enough good things. This heater does exactly what they say it does. Quality is immediately evident. All parts fit perfectly and tightly. All screw holes line up perfectly. Once in operation the heat radiates outwardly nice and even. Couldn't be happier with this purchase

HOW IT WORKS

The engineering behind Timber Heaters create a pellet heating system that requires no electricity and has no moving parts. The elimination of the auger and the blower fan, key components in ordinary pellet stoves, allows our Stoves to be portable and free from hardware failure.

IT ALL STARTS WITH THE FUEL

Wood pellets are an extremely efficient biomass fuel that create radiant dry heat. As a by-product of the saw mill industry that would otherwise be waste, pellets are very economical, costing roughly \$5 for a 40 Lb bag.

THE GRAVITY FEED SYSTEM

Wood pellets are poured into the hopper located at the back of the stove. The fuel is funneled into the firebox, covering the fire pot. A log jam effect is created, only allowing a certain amount of fuel in the fire box. The pellets are manually lit with fire gel or charcoal lighting fluid. As the pellets burn, they reduce in size and turn into ash, allowing new fuel to come in. This Enables the stove to burn continuously for hours.

THE DRAFT SYSTEM

Without vertical stove pipe and a sealed firebox, Timber stoves would not work. Wood pellets need to have forced air in order to burn completely and efficiently. As hot air rises up and is pushed through the stove pipe, its velocity increases due to constriction. This creates a vacuum inside the firebox, pulling air from slots on the bottom of the stove up through the firepot.

TIMBER GRIDDLE

Removable Griddle Top For Big & Lil Timber Heaters

- 412 Sq. Inch Cooking Area
- Variable Temps With Stove Damper
- No Assembly Required

Removable Pizza Oven For Big & Lil Timber Heaters

- 288 Sq. Inch Cooking Area
- 400-600° Temperatures
- Optional Smoke System

COMPLETE COOK KIT

The New Burn Box accepts both the Pizza Oven & Timber Griddle

- Perfect for Camping/Tailgating
- No Power & No Moving Parts
- Provides 1.5 Hrs of Cook Time
